

Methadone (CAS 76-99-3) Market Research Report 2025

<https://marketpublishers.com/r/MFD3130BAE4EN.html>

Date: May 2025

Pages: 70

Price: US\$ 2,200.00 (Single User License)

ID: MFD3130BAE4EN

Abstracts

Methadone (CAS 76-99-3) Market Research Report 2025 presents comprehensive data on Methadone markets globally and regionally (Europe, Asia, North America etc.)

The report includes Methadone description, covers its application areas and related patterns. It overviews Methadone market, names Methadone producers and indicates its suppliers.

Besides, the report provides Methadone prices in regional markets.

In addition to the above the report determines Methadone consumers in the market.

BAC Reports offers its clients in-depth market research of chemical industry products on the global and regional markets (North & Latin America, Asia Pacific, European Union, Russia and CIS).

We can analyze the following elements for each chemical product in any country or region:

capacities and production

consumption volume and structure

market price trends

exports and imports

existing technologies

feedstock market condition

market news digest

market forecast.

Methadone (CAS 76-99-3) Market Research Report 2025 can feature:

market condition and estimations, market forecast

chemical product ranges, trademarks, analogous products, application areas

regional and global producers, consumers and traders (including contact details).

Contents

1. METHADONE (CAS 61-32-5)

- 1.1. General information, synonyms
- 1.2. Composition, chemical structure
- 1.3. Safety information
- 1.4. Hazards identification
- 1.5. Handling and storage
- 1.6. Toxicological & ecological information
- 1.7. Transport information

2. METHADONE APPLICATIONS

- 2.1. Methadone application spheres, downstream products

3. METHADONE MANUFACTURING METHODS

4. METHADONE PATENTS

- Abstract
- Description
- Summary of the invention
- Detailed description of the invention

5. METHADONE MARKET WORLDWIDE

- 5.1. General Methadone market situation, trends
- 5.2. Manufacturers of Methadone
 - Europe
 - Asia
 - North America
 - Other regions
- 5.3. Methadone suppliers (importers, local distributors)
 - Europe
 - Asia
 - North America
 - Other regions

5.4. Methadone market forecast

6. METHADONE MARKET PRICES

6.1. Methadone prices in Europe

6.2. Methadone prices in Asia

6.3. Methadone prices in North America

6.4. Methadone prices in other regions

7. METHADONE END-USE SECTOR

7.1. Methadone market by application sphere

7.2. Methadone downstream markets trends and prospects

*Please note that Methadone (CAS 76-99-3) Market Research Report 2025 is a half ready publication and contents are subject to change. It only requires updating with the help of new data that are constantly retrieved from Publisher's databases and other sources. This updating process takes 5-7 business days after order is placed. Thus, our clients always obtain a revised and updated version of each report. Please also note that we do not charge for such an updating procedure. BAC Reports has information for more than 25,000 different chemicals available but it is impossible to have all reports updated immediately. That is why it takes 5-7 days to update a report after an order is received.

About

Methadone (Symoron, Dolophine, Amidone, Methadose, Physeptone, Heptadon, Phy and many others) is synthetic diphenylpropylamine similar in structure to acetylmethadol and propoxyphene, with the formula $C_{21}H_{27}NO$.

Methadone was developed in Germany in the late 1930s in anticipation of possible shortages of raw opium. However, it was only in 1947 that the synthetic substance was given the generic name 'methadone' by the Council on Pharmacy and Chemistry of the American Medical Association. Commercial production was first introduced in the United States by Eli Lilly and Company. Only then methadone was given the trade name Dolophine, from the Latin 'dolor' meaning 'pain' and 'finis' meaning 'end'.

Methadone is used medically as an analgesic, antitussive and maintenance anti-addictive for use in patients on opioids. Although chemically unlike morphine or heroin, methadone also acts on the opioid receptors and thus produces many of the same effects. Methadone is also used in managing chronic pain owing to its long duration of action and very low cost.

Methadone is not intended to reduce the use of non-narcotic drugs such as cocaine, methamphetamine, or alcohol.

Today a number of pharmaceutical companies produce and distribute methadone. The major producer remains Mallinckrodt, who sells bulk methadone to most of the producers of generic preparations, and also distributes its own brand name product in the form of tablets, dispersible tablets and oral concentrate under the name Methadose in the United States.

Methadone market is covered in the study Methadone (CAS 76-99-3) Market Research Report 2025. The report encompasses proper description of the product, unveils application areas, and briefly summarizes patents in the sphere. It overlooks methadone market situation, names manufacturers, suppliers as well as users. The report also provides current methadone prices in the market.
