

Methyl Acetate (CAS 79-20-9) Market Research Report 2025

<https://marketpublishers.com/r/MF9D7EFBC78EN.html>

Date: May 2025

Pages: 70

Price: US\$ 2,200.00 (Single User License)

ID: MF9D7EFBC78EN

Abstracts

Methyl Acetate (CAS 79-20-9) Market Research Report 2025 presents comprehensive data on Methyl Acetate markets globally and regionally (Europe, Asia, North America etc.)

The report includes Methyl Acetate description, covers its application areas and related patterns. It overviews Methyl Acetate market, names Methyl Acetate producers and indicates its suppliers.

Besides, the report provides Methyl Acetate prices in regional markets.

In addition to the above the report determines Methyl Acetate consumers in the market.

BAC Reports offers its clients in-depth market research of chemical industry products on the global and regional markets (North & Latin America, Asia Pacific, European Union, Russia and CIS).

We can analyze the following elements for each chemical product in any country or region:

capacities and production

consumption volume and structure

market price trends

exports and imports

existing technologies

feedstock market condition

market news digest

market forecast.

Methyl Acetate (CAS 79-20-9) Market Research Report 2025 can feature:

market condition and estimations, market forecast

chemical product ranges, trademarks, analogous products, application areas

regional and global producers, consumers and traders (including contact details).

Contents

1. METHYL ACETATE (CAS 79-20-9)

- 1.1. General information, synonyms
- 1.2. Composition, chemical structure
- 1.3. Safety information
- 1.4. Hazards identification
- 1.5. Handling and storage
- 1.6. Toxicological & ecological information
- 1.7. Transport information

2. METHYL ACETATE APPLICATIONS

- 2.1. Methyl Acetate application spheres, downstream products

3. METHYL ACETATE MANUFACTURING METHODS

4. METHYL ACETATE PATENTS

- Abstract
- Description
- Summary of the invention
- Detailed description of the invention

5. METHYL ACETATE MARKET WORLDWIDE

- 5.1. General Methyl Acetate market situation, trends
- 5.2. Manufacturers of Methyl Acetate
 - Europe
 - Asia
 - North America
 - Other regions
- 5.3. Methyl Acetate suppliers (importers, local distributors)
 - Europe
 - Asia
 - North America
 - Other regions

5.4. Methyl Acetate market forecast

6. METHYL ACETATE MARKET PRICES

6.1. Methyl Acetate prices in Europe

6.2. Methyl Acetate prices in Asia

6.3. Methyl Acetate prices in North America

6.4. Methyl Acetate prices in other regions

7. METHYL ACETATE END-USE SECTOR

7.1. Methyl Acetate market by application sphere

7.2. Methyl Acetate downstream markets trends and prospects

*Please note that Methyl Acetate (CAS 79-20-9) Market Research Report 2025 is a half ready publication and contents are subject to change. It only requires updating with the help of new data that are constantly retrieved from Publisher's databases and other sources. This updating process takes 5-7 business days after order is placed. Thus, our clients always obtain a revised and updated version of each report. Please also note that we do not charge for such an updating procedure. BAC Reports has information for more than 25,000 different chemicals available but it is impossible to have all reports updated immediately. That is why it takes 5-7 days to update a report after an order is received.

About

Product Name:	Methyl Acetate
Synonyms:	Methyl acetate
	Natural Methyl acetate
	THIOGYCOLIC ACID
	Methyl ethanoate
CAS#:	79-20-9
Formula:	$C_3H_6O_2$
Molecular Weight:	74.08

Methyl acetate, also known as acetic acid, devoton, methyl ester, tereton, etc., is a carboxylate ester with the molecular formula $C_3H_6O_2$ and molecular weight 74.07. Methyl acetate is a clear, colorless liquid with pleasant and fruity smell. The product has the boiling point 57-58 °C and easily dissolves in methanol. Besides, methyl acetate is soluble in hot and cold water at elevated temperature. Methyl acetate is highly flammable with a flammability point of 3.

Industrially, methyl acetate is processed by carbonylation of methanol as a byproduct of acetic acid production; by esterification of acetic acid with methanol.

The product is extensively employed as an intermediate in the range of applications. Methyl acetate is a reaction solvent in the production of dyes, perfumes, fast drying paints, cellulose adhesives, nail polish removers. Cosmetics, textiles, paints, coatings and motor industries are amid the main consumers of methyl acetate.

Methyl acetate is the compound that causes severe irritation of eyes characterized by tearing, pain and redness. Direct contact of the product and skin may lead to the loss of natural oils and irritation of the skin. Accidental ingestion of methyl acetate causes nausea, abdominal pain. Inhalation of the product will result in such side effects as irritation of the respiratory tract, eyes and nose; shortness of breath; headache; palpitation; conjunctivitis, etc. Prolonged or repeated contact with methyl acetate may produce optic nerve damage.

Methyl acetate market is covered in the study Methyl Acetate (CAS 79-20-9) Market Research Report 2025. The report encompasses proper description of the product, unveils application areas, and briefly summarizes patents in the sphere. It overlooks methyl acetate market situation, names manufacturers, suppliers as well as users. The report also provides current methyl acetate prices in the market.
