

Myo-inositol (CAS 87-89-8) Market Research Report 2024

<https://marketpublishers.com/r/MED2F6CEA1AEN.html>

Date: July 2024

Pages: 70

Price: US\$ 2,200.00 (Single User License)

ID: MED2F6CEA1AEN

Abstracts

Myo-inositol (CAS 87-89-8) Market Research Report 2024 presents comprehensive data on Myo-inositol markets globally and regionally (Europe, Asia, North America etc.)

The report includes Myo-inositol description, covers its application areas and related patterns. It overviews Myo-inositol market, names Myo-inositol producers and indicates its suppliers.

Besides, the report provides Myo-inositol prices in regional markets.

In addition to the above the report determines Myo-inositol consumers in the market.

BAC Reports offers its clients in-depth market research of chemical industry products on the global and regional markets (North & Latin America, Asia Pacific, European Union, Russia and CIS).

We can analyze the following elements for each chemical product in any country or region:

capacities and production

consumption volume and structure

market price trends

exports and imports

existing technologies

feedstock market condition

market news digest

market forecast.

Myo-inositol (CAS 87-89-8) Market Research Report 2024 can feature:

market condition and estimations, market forecast

chemical product ranges, trademarks, analogous products, application areas

regional and global producers, consumers and traders (including contact details).

Contents

1. MYO-INOSITOL (CAS 87-89-8)

- 1.1. General information, synonyms
- 1.2. Composition, chemical structure
- 1.3. Safety information
- 1.4. Hazards identification
- 1.5. Handling and storage
- 1.6. Toxicological & ecological information
- 1.7. Transport information

2. MYO-INOSITOL APPLICATIONS

- 2.1. Myo-inositol application spheres, downstream products

3. MYO-INOSITOL MANUFACTURING METHODS

4. MYO-INOSITOL PATENTS

- Abstract
- Description
- Summary of the invention
- Detailed description of the invention

5. MYO-INOSITOL MARKET WORLDWIDE

- 5.1. General Myo-inositol market situation, trends
- 5.2. Manufacturers of Myo-inositol
 - Europe
 - Asia
 - North America
 - Other regions
- 5.3. Myo-inositol suppliers (importers, local distributors)
 - Europe
 - Asia
 - North America
 - Other regions

5.4. Myo-inositol market forecast

6. MYO-INOSITOL MARKET PRICES

- 6.1. Myo-inositol prices in Europe
- 6.2. Myo-inositol prices in Asia
- 6.3. Myo-inositol prices in North America
- 6.4. Myo-inositol prices in other regions

7. MYO-INOSITOL END-USE SECTOR

- 7.1. Myo-inositol market by application sphere
- 7.2. Myo-inositol downstream markets trends and prospects

*Please note that Myo-inositol (CAS 87-89-8) Market Research Report 2024 is a half ready publication and contents are subject to change. It only requires updating with the help of new data that are constantly retrieved from Publisher's databases and other sources. This updating process takes 5-7 business days after order is placed. Thus, our clients always obtain a revised and updated version of each report. Please also note that we do not charge for such an updating procedure. BAC Reports has information for more than 25,000 different chemicals available but it is impossible to have all reports updated immediately. That is why it takes 5-7 days to update a report after an order is received.

About

Product Name: Myo-inositol

Synonyms:

Inositol

Cyclohexane-1,2,3,4,5,6-hexol

Cyclohexanehexol

Hexahydroxycyclohexane

Inositol, i-

Inositol

Cyclohexitol

meso-Inositol

myo-Inositol

CAS#: 87-89-8

Formula: $C_6H_{12}O_6$

Molecular Weight: 180.16

Appearance: White crystalline powder

Usage: Antidepressent.

Myo-inositol, also known as inositol, meso-Inositol, Muco-Inositol, mesoinositol, Scyllo-inositol, Allo-inositol, epi-Inositol, Myoinositol, Dambose, chiro-inositol, i-Inositol, Meat sugar, Iso-inositol, Phaseomannite, Phaseomannitol, Mesoinosite, Quercinitol, Inositene, Inositina, is the most common form of inositol that is a natural nutrient found in many foods such as fruits, nuts, beans and classified as a carbocyclic polyol. Myo-inositol is a white solid with molecular weight 180.15 and molecular formula $C_6H_{12}O_6$. The melting point of the powder is 222-227 °C. Myo-inositol is incompatible with strong oxidizing agents.

Myo-inositol is processed from glucose-6-phosphate. First, glucose-6-phosphate is

isomerised to myo-inositol 1-phosphate. Then, myo-inositol 1-phosphate is dephosphorylated by an inositol monophosphatase enzyme to myo-inositol. Naturally, the product is synthesized in the kidneys.

Myo-inositol is a vital structural basis for a number of secondary messengers in eukaryotic cells, and a significant component of the structural lipids phosphatidylinositol. Myo-inositol prevents and controls the collection of fats in the liver, helps the body to maintain a healthy metabolism. Furthermore, the product promotes healthy hair growth. Myo-inositol is considered to be a necessary nutrient for brain nourishing. A deficiency of the product in the human body can lead to constipation, high cholesterol, problems with vision and general eye health, and hair loss. Myo-inositol is believed to affect such illnesses as depression and cancer. In conjunction with other nutrients myo-inositol can help a body to recover from a disease.

Transient discomfort of eyes characterized by pain and redness, nausea, vomiting are possible health effects that can be caused by exposure to myo-inositol. However, these health effects described are based on experience with chemically related materials.

Myo-inositol market is covered in the study Myo-inositol (CAS 87-89-8) Market Research Report 2023. The report encompasses proper description of the product, unveils application areas, and briefly summarizes patents in the sphere. It overlooks Myo-inositol market situation, names manufacturers, suppliers as well as users. The report also provides current Myo-inositol prices in the market.
