

4-tert-Butylphenol (CAS 98-54-4) Market Research Report 2025

<https://marketpublishers.com/r/OE9DCE560CFEN.html>

Date: May 2025

Pages: 70

Price: US\$ 2,200.00 (Single User License)

ID: OE9DCE560CFEN

Abstracts

4-tert-Butylphenol (CAS 98-54-4) Market Research Report 2025 presents comprehensive data on 2-tert-Butylphenol markets globally and regionally (Europe, Asia, North America etc.)

The report includes 2-tert-Butylphenol description, covers its application areas and related patterns. It overviews 2-tert-Butylphenol market, names 2-tert-Butylphenol producers and indicates its suppliers.

Besides, the report provides 2-tert-Butylphenol prices in regional markets.

In addition to the above the report determines 2-tert-Butylphenol consumers in the market.

BAC Reports offers its clients in-depth market research of chemical industry products on the global and regional markets (North & Latin America, Asia Pacific, European Union, Russia and CIS).

We can analyze the following elements for each chemical product in any country or region:

capacities and production

consumption volume and structure

market price trends

exports and imports

existing technologies

feedstock market condition

market news digest

market forecast.

4-tert-Butylphenol (CAS 98-54-4) Market Research Report 2025 can feature:

market condition and estimations, market forecast

chemical product ranges, trademarks, analogous products, application areas

regional and global producers, consumers and traders (including contact details).

Contents

1. 2-TERT-BUTYLPHENOL (CAS 88-18-6)

- 1.1. General information, synonyms
- 1.2. Composition, chemical structure
- 1.3. Safety information
- 1.4. Hazards identification
- 1.5. Handling and storage
- 1.6. Toxicological & ecological information
- 1.7. Transport information

2. 2-TERT-BUTYLPHENOL APPLICATIONS

- 2.1. 2-tert-Butylphenol application spheres, downstream products

3. 2-TERT-BUTYLPHENOL MANUFACTURING METHODS

4. 2-TERT-BUTYLPHENOL PATENTS

- Abstract
- Description
- Summary of the invention
- Detailed description of the invention

5. 2-TERT-BUTYLPHENOL MARKET WORLDWIDE

- 5.1. General 2-tert-Butylphenol market situation, trends
- 5.2. Manufacturers of 2-tert-Butylphenol
 - Europe
 - Asia
 - North America
 - Other regions
- 5.3. 2-tert-Butylphenol suppliers (importers, local distributors)
 - Europe
 - Asia
 - North America
 - Other regions

5.4. 2-tert-Butylphenol market forecast

6. 2-TERT-BUTYLPHENOL MARKET PRICES

6.1. 2-tert-Butylphenol prices in Europe

6.2. 2-tert-Butylphenol prices in Asia

6.3. 2-tert-Butylphenol prices in North America

6.4. 2-tert-Butylphenol prices in other regions

7. 2-TERT-BUTYLPHENOL END-USE SECTOR

7.1. 2-tert-Butylphenol market by application sphere

7.2. 2-tert-Butylphenol downstream markets trends and prospects

*Please note that 4-tert-Butylphenol (CAS 98-54-4) Market Research Report 2025 is a half ready publication and contents are subject to change. It only requires updating with the help of new data that are constantly retrieved from Publisher's databases and other sources. This updating process takes 5-7 business days after order is placed. Thus, our clients always obtain a revised and updated version of each report. Please also note that we do not charge for such an updating procedure. BAC Reports has information for more than 25,000 different chemicals available but it is impossible to have all reports updated immediately. That is why it takes 5-7 days to update a report after an order is received.

About

Product Name:	2-tert-Butylphenol
Synonyms:	2-(1,1-Dimethylethyl)phenol 2-tert-Butyl-1-hydroxybenzene Phenol, 2-(1,1-dimethylethyl)-
CAS#:	88-18-6
Formula:	C ₁₀ H ₁₄ O
Molecular Weight:	150.22
Appearance:	Light yellow liquid.
Usage:	Chemical intermediate for synthetic resins, plasticizers, surface-active agents, perfumes, & other products.

The report encompasses proper description of the product, Diisononyl phthalate (DINP), a.k.a. diisononyl ester, Bis(7-methyloctyl) phthalate, phthalic acid, is a common plasticizer with the molecular formula C₂₆H₄₂O₄ and molecular weight 418.60. Diisononyl phthalate, a clear colorless odorless oily viscous liquid, is a mixture of isomers. The product is insoluble in water but soluble in acetone and aromatic hydrocarbons. The boiling point of diisononyl phthalate is 244-252 °C.

About 95% of DINP is employed in PVC applications. The product is used in various products from electrical wires, coated fabrics and automotive parts to lamination film and footwear. Diisononyl phthalate can be employed for coating applications. Besides, the product can be utilized in such non-polymer applications as paints, printing inks for T-shirts, adhesives, etc.

Diisononyl phthalate can be found in polymer materials in high concentrations.

The potential irritation risk caused by DINP is very low. It may produce mild irritation of eyes without any damage. High viscosity of diisononyl phthalate makes the inhalation of its vapor or mist hardly possible.

Diisononyl phthalate DINP market is covered in the study Diisononyl Phthalate DINP (CAS 28553-12-0) unveils application areas, and briefly summarizes patents in the

sphere. It overlooks Diisononyl phthalate DINP market situation, names manufacturers, suppliers as well as users. The report also provides current Diisononyl phthalate DINP prices in the market.
