

Polychloroprene (CAS 9010-98-4) Market Research Report 2025

<https://marketpublishers.com/r/PB91308B9FFEN.html>

Date: May 2025

Pages: 70

Price: US\$ 2,200.00 (Single User License)

ID: PB91308B9FFEN

Abstracts

Polychloroprene (CAS 9010-98-4) Market Research Report 2025 presents comprehensive data on Polychloroprene markets globally and regionally (Europe, Asia, North America etc.)

The report includes Polychloroprene description, covers its application areas and related patterns. It overviews Polychloroprene market, names Polychloroprene producers and indicates its suppliers.

Besides, the report provides Polychloroprene prices in regional markets.

In addition to the above the report determines Polychloroprene consumers in the market.

BAC Reports offers its clients in-depth market research of chemical industry products on the global and regional markets (North & Latin America, Asia Pacific, European Union, Russia and CIS).

We can analyze the following elements for each chemical product in any country or region:

capacities and production

consumption volume and structure

market price trends

exports and imports

existing technologies

feedstock market condition

market news digest

market forecast.

Polychloroprene (CAS 9010-98-4) Market Research Report 2025 can feature:

market condition and estimations, market forecast

chemical product ranges, trademarks, analogous products, application areas

regional and global producers, consumers and traders (including contact details).

Contents

1. POLYCHLOROPRENE (CAS 9010-98-4)

- 1.1. General information, synonyms
- 1.2. Composition, chemical structure
- 1.3. Safety information
- 1.4. Hazards identification
- 1.5. Handling and storage
- 1.6. Toxicological & ecological information
- 1.7. Transport information

2. POLYCHLOROPRENE APPLICATIONS

- 2.1. Polychloroprene application spheres, downstream products

3. POLYCHLOROPRENE MANUFACTURING METHODS

4. POLYCHLOROPRENE PATENTS

- Abstract
- Description
- Summary of the invention
- Detailed description of the invention

5. POLYCHLOROPRENE MARKET WORLDWIDE

- 5.1. General Polychloroprene market situation, trends
- 5.2. Manufacturers of Polychloroprene
 - Europe
 - Asia
 - North America
 - Other regions
- 5.3. Polychloroprene suppliers (importers, local distributors)
 - Europe
 - Asia
 - North America
 - Other regions

5.4. Polychloroprene market forecast

6. POLYCHLOROPRENE MARKET PRICES

6.1. Polychloroprene prices in Europe

6.2. Polychloroprene prices in Asia

6.3. Polychloroprene prices in North America

6.4. Polychloroprene prices in other regions

7. POLYCHLOROPRENE END-USE SECTOR

7.1. Polychloroprene market by application sphere

7.2. Polychloroprene downstream markets trends and prospects

*Please note that Polychloroprene (CAS 9010-98-4) Market Research Report 2025 is a half ready publication and contents are subject to change. It only requires updating with the help of new data that are constantly retrieved from Publisher's databases and other sources. This updating process takes 5-7 business days after order is placed. Thus, our clients always obtain a revised and updated version of each report. Please also note that we do not charge for such an updating procedure. BAC Reports has information for more than 25,000 different chemicals available but it is impossible to have all reports updated immediately. That is why it takes 5-7 days to update a report after an order is received.

About

| | |
|---------------|--|
| Product Name: | Polychloroprene |
| Synonyms: | Neoprene |
| | Poly(chloroprene) |
| | Chloroprene Rubber |
| | Poly-(2-chloro-1,3-butadiene) |
| CAS#: | 9010-98-4 |
| Formula: | C_4H_5Cl |
| Appearance: | Amber chunks. |
| Usage: | Solid form: mechanical rubber products, lining oil-loading hose and reaction equipment, adhesive cement, binder for rocket fuels, coatings for electric wiring, gaskets and seals, liquid form: specialty items made by dipping or electrophoresis from latex, foam form: adhesive tape to replace metal fas |

Polychloroprene is a speciality elastomer, produced by polymerization of chloroprene. It has the chemical formula C_4H_5Cl . Polychloroprene is insoluble in water and usually occurs as white/beige chunks, which have a slight characteristic odor. Polychloroprene is manufactured in four grades: normal linear (general-purpose grades), precrosslinked, sulfur-modified and slow crystallizing grades.

Polychloroprene is commercially known as neoprene. The major product application area is the rubber industry. Polychloroprene is used as a feedstock for the production of adhesives and coatings. The compound is either required in the automotive and construction industries. Given polychloroprene's resistance to sun, water and weather conditions, it acts as an excellent component of life jackets, professional diving suits, wet suits, gloves and many other home goods. Polychloroprene is also employed as a protective covering in wire and cable systems.

Western Europe calls for almost 30% share of the world polychloroprene output. The US and Japan represent top country markets for polychloroprene, together accounting for over 50% of the overall production volume. The global annual consumption of polychloroprene is estimated at nearly 300 thousand tonnes. The list of the top polychloroprene manufacturers includes but is not limited to LANXESS AG, DuPont, Tosoh Corporation, Abtomsart Chemicals Co., Ltd., Showa Denko K.K., Denki Kagaku Kogyo Kabushiki Kaisha and Shanxi Synthetic Rubber Group Co., Ltd.

The polychloroprene market is covered in the Polychloroprene (CAS 9010-98-4) Market Research Report 2025. The report encompasses proper description of the product, unveils application areas, and briefly summarizes patents in the sphere. It overlooks the polychloroprene market situation, names manufacturers, suppliers as well as users. The report also provides current polychloroprene prices.
