

Propyne (CAS 74-99-7) Market Research Report 2025

<https://marketpublishers.com/r/P49DEB6A31DEN.html>

Date: May 2025

Pages: 70

Price: US\$ 2,200.00 (Single User License)

ID: P49DEB6A31DEN

Abstracts

Propyne (CAS 74-99-7) Market Research Report 2025 presents comprehensive data on Methylacetylene markets globally and regionally (Europe, Asia, North America etc.)

The report includes Methylacetylene description, covers its application areas and related patterns. It overviews Methylacetylene market, names Methylacetylene producers and indicates its suppliers.

Besides, the report provides Methylacetylene prices in regional markets.

In addition to the above the report determines Methylacetylene consumers in the market.

BAC Reports offers its clients in-depth market research of chemical industry products on the global and regional markets (North & Latin America, Asia Pacific, European Union, Russia and CIS).

We can analyze the following elements for each chemical product in any country or region:

capacities and production

consumption volume and structure

market price trends

exports and imports

existing technologies

feedstock market condition

market news digest

market forecast.

Propyne (CAS 74-99-7) Market Research Report 2025 can feature:

market condition and estimations, market forecast

chemical product ranges, trademarks, analogous products, application areas

regional and global producers, consumers and traders (including contact details).

Contents

1. METHYLACETYLENE (CAS 74-99-7)

- 1.1. General information, synonyms
- 1.2. Composition, chemical structure
- 1.3. Safety information
- 1.4. Hazards identification
- 1.5. Handling and storage
- 1.6. Toxicological & ecological information
- 1.7. Transport information

2. METHYLACETYLENE APPLICATIONS

- 2.1. Methylacetylene application spheres, downstream products

3. METHYLACETYLENE MANUFACTURING METHODS

4. METHYLACETYLENE PATENTS

- Abstract
- Description
- Summary of the invention
- Detailed description of the invention

5. METHYLACETYLENE MARKET WORLDWIDE

- 5.1. General Methylacetylene market situation, trends
- 5.2. Manufacturers of Methylacetylene
 - Europe
 - Asia
 - North America
 - Other regions
- 5.3. Methylacetylene suppliers (importers, local distributors)
 - Europe
 - Asia
 - North America
 - Other regions

5.4. Methylacetylene market forecast

6. METHYLACETYLENE MARKET PRICES

6.1. Methylacetylene prices in Europe

6.2. Methylacetylene prices in Asia

6.3. Methylacetylene prices in North America

6.4. Methylacetylene prices in other regions

7. METHYLACETYLENE END-USE SECTOR

7.1. Methylacetylene market by application sphere

7.2. Methylacetylene downstream markets trends and prospects

*Please note that Propyne (CAS 74-99-7) Market Research Report 2025 is a half ready publication and contents are subject to change. It only requires updating with the help of new data that are constantly retrieved from Publisher's databases and other sources. This updating process takes 5-7 business days after order is placed. Thus, our clients always obtain a revised and updated version of each report. Please also note that we do not charge for such an updating procedure. BAC Reports has information for more than 25,000 different chemicals available but it is impossible to have all reports updated immediately. That is why it takes 5-7 days to update a report after an order is received.

About

Product Name: Methylacetylene

Synonyms:

Propyne

1-Propyne

Allylene

Methylacetylene

CAS#: 74-99-7

Formula: C_3H_4

Molecular Weight: 40.06

Propyne belongs to the class of alkynes and is also called methylacetylene. Propyne is a colorless, non-toxic liquefied gas with a sweet smell and with the molecular formula C_3H_4 .

Propyne is insoluble in water, soluble in ethanol, chloroform and benzene. Its boiling point is $-23.2\text{ }^\circ\text{C}$. This alkyne is flammable at room temperature. Propyne forms explosives mixtures with air and oxidizing agents. Propyne can be safely condensed. The gas is present in the atmosphere of outer planets.

Propyne is used for rocket fuel production. Besides, it is used in oxy-fuel welding and cutting torches.

Exposure routes to propyne are via inhalation, skin and/or eye contact. The compound poses several side effects on humans. Propyne causes frostbite injury, severe tissue burns, rapid breathing and rapid heart rate. Headaches, dizziness, mood disturbances, numbness of the extremities, sleepiness, mental confusion, etc. are possible in acute cases.

Propyne market is covered in the study Propyne (CAS 74-99-7) Market Research Report 2025. The report encompasses proper description of the product, unveils application areas, and briefly summarizes patents in the sphere. It overlooks propyne market situation, names manufacturers, suppliers as well as users. The report also

provides current propyne prices in the market.
