

Pyridine (CAS 110-86-1) Market Research Report 2025

<https://marketpublishers.com/r/P9F11DCAEE7EN.html>

Date: May 2025

Pages: 70

Price: US\$ 2,200.00 (Single User License)

ID: P9F11DCAEE7EN

Abstracts

Pyridine (CAS 110-86-1) Market Research Report 2025 presents comprehensive data on Pyridine markets globally and regionally (Europe, Asia, North America etc.)

The report includes Pyridine description, covers its application areas and related patterns. It overviews Pyridine market, names Pyridine producers and indicates its suppliers.

Besides, the report provides Pyridine prices in regional markets.

In addition to the above the report determines Pyridine consumers in the market.

BAC Reports offers its clients in-depth market research of chemical industry products on the global and regional markets (North & Latin America, Asia Pacific, European Union, Russia and CIS).

We can analyze the following elements for each chemical product in any country or region:

capacities and production

consumption volume and structure

market price trends

exports and imports

existing technologies

feedstock market condition

market news digest

market forecast.

Pyridine (CAS 110-86-1) Market Research Report 2025 can feature:

market condition and estimations, market forecast

chemical product ranges, trademarks, analogous products, application areas

regional and global producers, consumers and traders (including contact details).

Contents

1. PYRIDINE (CAS 110-86-1)

- 1.1. General information, synonyms
- 1.2. Composition, chemical structure
- 1.3. Safety information
- 1.4. Hazards identification
- 1.5. Handling and storage
- 1.6. Toxicological & ecological information
- 1.7. Transport information

2. PYRIDINE APPLICATIONS

- 2.1. Pyridine application spheres, downstream products

3. PYRIDINE MANUFACTURING METHODS

4. PYRIDINE PATENTS

- Abstract
- Description
- Summary of the invention
- Detailed description of the invention

5. PYRIDINE MARKET WORLDWIDE

- 5.1. General Pyridine market situation, trends
- 5.2. Manufacturers of Pyridine
 - Europe
 - Asia
 - North America
 - Other regions
- 5.3. Pyridine suppliers (importers, local distributors)
 - Europe
 - Asia
 - North America
 - Other regions

5.4. Pyridine market forecast

6. PYRIDINE MARKET PRICES

6.1. Pyridine prices in Europe

6.2. Pyridine prices in Asia

6.3. Pyridine prices in North America

6.4. Pyridine prices in other regions

7. PYRIDINE END-USE SECTOR

7.1. Pyridine market by application sphere

7.2. Pyridine downstream markets trends and prospects

*Please note that Pyridine (CAS 110-86-1) Market Research Report 2025 is a half ready publication and contents are subject to change. It only requires updating with the help of new data that are constantly retrieved from Publisher's databases and other sources. This updating process takes 5-7 business days after order is placed. Thus, our clients always obtain a revised and updated version of each report. Please also note that we do not charge for such an updating procedure. BAC Reports has information for more than 25,000 different chemicals available but it is impossible to have all reports updated immediately. That is why it takes 5-7 days to update a report after an order is received.

About

Product Name: Pyridine

Synonyms:

Azabenzene

Pyridine,crude,light

Pyridine

CAS#: 110-86-1

Formula: C_5H_5N

Molecular Weight: 79.09

Pyridine is a heterocyclic aromatic tertiary amine with the molecular formula C_5H_5N . The product is a colorless to yellow liquid with a Sharp, nauseating, burnt, sickening smell. The boiling point of pyridine is 115 °C. Pyridine is miscible with water at 20 °C and readily dissolves in alcohols, ethers, oils and benzene. The product is stable under normal temperatures and pressures. It is toxic, dangerous for the environment, highly flammable and harmful.

Pyridine is a vital raw material in the chemical industry. In the pharmaceutical industry it serves as a component for making of numerous drugs, insecticides and herbicides. Pyridine is utilized as a denaturant for antifreeze mixtures, as a dyeing assistant in textiles and in fungicides. Pyridine is used also in the textile industry to improve network capacity of cotton. The product is converted into sulfapyridine, pyribenzamine, pyrilamine, piperidine. Mixed with picolines and other substances, pyridine is used as a denaturant for ethanol, as a solvent in laboratories.

Pyridine can cause severe side effects producing eyes irritation or even eye damage 24 hours or more after instillation. Furthermore, it may affect skin causing mild but significant inflammation of the skin. Repeated exposure to pyridine can cause contact dermatitis. Ingestion of the product can entail mild anorexia, nausea, fatigue and mental depression, and after prolonged administration, hepatorenal damage. Asthmatic breathing, headache, dizziness, nausea, anorexia, insomnia, increased urinary frequency and central nervous system depression are amid side effects of inhalation of pyridine.

Pyridine market is covered in the study Pyridine (CAS 110-86-1) Market Research Report 2025. The report encompasses proper description of the product, unveils application areas, and briefly summarizes patents in the sphere. It overlooks pyridine market situation, names manufacturers, suppliers as well as users. The report also provides current pyridine prices in the market.
