About

Product Name: Aluminum strontium oxide
Synonyms: Strontium aluminate
CAS#: 12004-37-4

Strontium aluminate is a metallic or silver, odorless solid with the molecular weight 309.20 molecular formula $Al_2O_5Sr_2$. The product is an ingredient for the performance of photoluminescent safety products. Crystals of strontium aluminate glow brighter and longer than crystals of zinc sulphide after exposure to light. Strontium aluminate is recognized as a product that represents the next generation in self-emitting light technology.

Strontium aluminate is employed in such safety grade commercial products as signs and emergency egress guidance systems. Strontium aluminate is widely used as an additive in fibre, paints, plastic, resin, printing slurry, ink. Moreover, it may be found in consumer products such as fishing tools and sporting goods, garments, safety products, toys, etc. The product also finds its application in industry, mainly in military installations, decorations, for fire emergency system, etc.

The product is safe and nonradioactive. Strontium aluminate irritates eyes, skin and respiratory tract.
