About Halogens Market in South Korea

Fluorine and bromine are major halogens imported to South Korea.

South Korea is an importer of fluorine as its production is insignificant in comparison with domestic consumption. The main suppliers of fluorine are Israel, China, and United Arab Emirates. In recent years import has decreased thanks to some local commercial initiatives related to fluorine production in South Korea. South Korea faces some problems related to fluoride utilization.

Chlorine demand grows every year in South Korea. Chlorine is mainly consumed in PVC resin production. South Korea imports chlorine mainly from Japan.

Iodine production does not meet country's demand so the product is also imported.

Report Scope

South Korea PESTEL gives an overview of diverse macro-environmental factors (political, economic, sociocultural, technological, environmental and legal) and analyzes what influence they exert on a business.

Halogens market overview: market trends, government regulations and market perspectives

Foreign trade data including halogens export/import operations in South Korea, main trade partners, prices
