Abstracts

Vandagraf International has been operating in the brand protection space for more than a decade, carrying out research and analysis of markets and technologies, successfully delivering consultancy assignments for individual clients as well as publishing techno-economic market reports.

Over the past several months the Vandagraf team has been re-working and extensively expanding a previous Vandagraf report of similar title published in 2011.

This time, as well as talking to a large number of industry specialists and reviewing published information, Vandagraf researchers have painstakingly visited over 250 company websites seeking out information, news and market developments on anti counterfeit, brand protection and tamper evidence.

This desk research has been massively time consuming, but it means that we have done it for you.

You can simply benefit from our findings and identify trends & business opportunities that work for you, identifying:

Who are the key players

Who owns whom

Mergers / Acquisitions/ Partnerships / Alliances – recent and not so recent

Leading integrators / Key technology players

Types of projects & client

Competitive analysis – Direct / indirect competition – 1st, 2nd, 3rd levels of defence

Major trends in the World of Brand Protection.

The number of companies actually covered is in reality many more than 250 numbered profiles. There are plenty of companies profiled that have two or more subsidiaries and in turn each may offer more than one security technology.

This examination & evaluation of these companies gives a valuable (and unique) overview of the global anti counterfeit & brand protection industry.

Companies covered range from start-ups to companies that have been in business for 100 years or more, from University spin-offs to major multi nationals.

Contents

VOLUME I - PART A INDUSTRY ANALYSIS

EXECUTIVE SUMMARY

1. INTRODUCTION

1.1 Product Related Crime

1.2.1 Driving Forces - China & the Internet

1.2.2 Product Crime is an Attractive Proposition for Criminals

1.2.3 Regional Factors

1.2.3.1 Structural Shifts in the World Manufacturing Industry

1.2.3.2 Strategic Implications for Global OEMs

1.2.3.3 The Next 10 Years – Trends in Global Manufacturing

1.2.3.4 Reversing the Trend – Reshoring from China

1.2.4 Complicit Consumer Behaviour

1.3 Fighting Counterfeiting Holistically

1.3.1 Trend towards Integrated Solutions

1.3.2 Ancillary Services & Enforcement

1.3.3 Consumer Enabled Brand Protection with Smart Phones

1.3.4 Online Brand Monitoring

1.3.5 Interface Public Members (IPM) – WCO / GS1

1.3.6 WCO Operations – Raids & Seizures

1.4 Digital Printing – A Double Edged Sword

1.4.1 Digital Printing – The Plus Side

1.4.2 Digital Printing – The Minus Side

1.4.2.1 Digital Fakes - New Generation Counterfeits

1.4.2.2 Case Study – Reverse Engineering of Watches with Digital Technology

1.5 Conflicts of Interests – Controlling Counterfeiting / Facilitating Free Trade

1.5.1 Background to the Anti counterfeiting Trade Agreement (ACTA)

1.6 Opportunities for Solutions Providers

1.6.1 Marketing of Brand Protection Solutions is Challenging

1.6.2 Market for Solutions Still Adds Up To Less than 1% of Financial Losses

2. MARKET SIZING & FORECASTS

2.1 The World Economy – An Overview

2.1.1 Evolution of World Real GDP – 1960 to 2012

- 2.1.2 Evolution of Real GDP by Region – 1960 to 2012
- 2.2 Global Financial Losses due to Product Related Crime
 - 2.2.1 Breakdown of Losses by Types of Counterfeit Products by Value
 - 2.2.2 Breakdown of Losses to Counterfeit Products by Country
- 2.3 The Brand Protection Solutions Market
 - 2.3.1 Breakdown & Evolution by Type of Brand Protection Solution
 - 2.3.2 Brand Protection Solutions & Value Added Processes
 - 2.3.3 Value Added – Label / Packaging Converters & Security Printers
 - 2.3.4 Market Breakdown by Type of Brand Protection Technology
 - 2.3.5 Forecast Annual Growth Rates for Leading Security Technologies
- 2.4 Growth of Digital Printing
- 2.5 The Value Chain and Pricing Issues

3. EVOLUTION IN THE COMPETITIVE ENVIRONMENT

- 3.1 Solution Providers and Positioning
 - 3.1.1 Distinct Classes of Providers of Brand Protection Solutions
 - 3.1.2 Leading Pioneer Innovators of Technology in Brand Protection
 - 3.1.3 Leading Integrators – Brand Protection Solutions
 - 3.1.4 Companies with Long Heritage
- 3.2 Trends - Solutions Rather than Single Technology Offerings

4. BUILDING BLOCKS - INTEGRATED SOLUTION PROVIDERS

- 4.1 Providers Moving to Integrated Solution Offerings
 - 4.1.1 The Path to Becoming a Provider of Integrated Solutions
 - 4.1.2 Requirements for a Fully Integrated End-to-End Brand Protection Solution
- 4.2 Combining Brand protection Technologies for Holistic Solutions
 - 4.2.1 Levels of Defence – 1st, 2nd& 3rd
 - 4.2.2 Three ascending Levels of Defence
 - 4.2.3 A Layered Approach
- 4.3 Ancillary and Support Services for Brand Protection Programmes
 - 4.3.1 Leading Providers - Inspection & Investigative Services
 - 4.3.2 Overview - Inspection & Investigative Services
 - 4.3.2.1 Inertia – Resistance to Change
 - 4.3.2.2 Aiming to Achieve Competitive Advantage
 - 4.3.2.3 Inspection Services
 - 4.3.2.4 Investigative Services
 - 4.3.2.5 Enforcement

- 4.3.2.6 Legal Support
- 4.3.2.7 Introducing a Method of Authentication & Validation for Customs Inspection
- 4.3.2.8 Offering an Inspection Tool That Can Support Legal Seizures
- 4.3.2.9 Risk Management Assessment
- 4.4 Brands Online – Threats & Brand Protection
 - 4.4.1 Leading Companies – Online Brand Protection / Monitoring
 - 4.4.2 Brands Online – Threats & Crimes
 - 4.4.3 Attractions of the Internet for Counterfeiters
 - 4.4.4 Major types of On-line branded product related crime
 - 4.4.5 Brands Online – Brand Protection
 - 4.4.6 Proliferation of gTLDs – A New Online Threat for Brand Owners
 - 4.4.7 Trends – Online Brand Protection
 - 4.4.7.1 Traditional Brand Protection is Forging Links with Online Specialists
- 4.5 Consumer Enabled Brand Protection with Smart Phones
 - 4.5.1 Leading Companies – Smart Phone Enabled Brand Protection
 - 4.5.2 Relative Growth Rates – Smart Phones / Packaging Industry
 - 4.5.3 Converging Technologies
 - 4.5.4 Key Benefits of Smart Phone Enabled Product Authentication
 - 4.5.5 Opportunities & Threats - Smart Phone Enabled Product Authentication
 - 4.5.5.1 Brand Owners
 - 4.5.5.2 Retailers
 - 4.5.5.3 Consumers
 - 4.5.6 Two-Way Data Traffic is set to Transform Product Authentication
 - 4.5.7 The Enlightened Packaging Converter / Printer
 - 4.5.8 What can be done in Practice

5. PACKAGING / LABELS CONVERTERS & SECURITY PRINTING

- 5.1 Leading Companies
 - 5.1.1 Leading Companies - Packaging / Label Converters
 - 5.1.2 Leading Companies - Security Printers
 - 5.1.3 Leading Companies - Materials for Packaging / Labels
- 5.2 Overview – Packaging / Labels Converters & Security Printing
 - 5.2.1 Form Factors, Devices & Materials
 - 5.2.1.1 Labels, Hang Tags / Swing Tickets – Anti Counterfeit Devices
 - 5.2.1.2 Security Packaging & Closures
 - 5.2.1.3 Security Materials for Packaging / Labels
 - 5.2.1.4 Tear Tapes
 - 5.2.1.5 Textile Labels & Raw Materials

- 5.2.1.6 Security Printing
- 5.2.1.7 Brand Protection Technologies – Viability of Packaging Formats
- 5.2.2 Securing Operations for Brand Protection
 - 5.2.2.1 Securing the Production Site - Packaging / Labels Converters
 - 5.2.2.2 Sub-contractors & Co-packers
 - 5.2.2.3 Securing the Supply Chain - Chain of Custody Requirements
- 5.3 Trends - Packaging / Label Converters and Security Printing
 - 5.3.1 Central Role for Packaging / Label Converters in Creating Integrated Solutions
 - 5.3.2 Digital Printing will Change the Brand Protection Landscape
 - 5.3.3 A Steady Stream of New Materials & Technologies with Security Features

6. MAJOR SECURITY TECHNOLOGY GROUPS & MATERIALS

- 6.1 Forensic Markers / Nano-tagants
 - 6.1.1 Leading Companies - Forensic Markers / Nano-tagants
 - 6.1.2 Overview - Forensic Markers / Nano-tagants
 - 6.1.2.1 DNA Solutions – Biological / Synthetic
 - 6.1.2.2 Organic / Biological DNA Molecular Marker Taggants
 - 6.1.2.3 Inorganic / Synthetic Molecular Markers – DNA / Rare Earth / Radioactive
 - 6.1.2.4 Miniature Barcodes / Nano-scale Nameplates / Microdots
 - 6.1.2.5 Colour Change / Fluorescents / Up Converting Phosphors (Quantum Dots)
 - 6.1.2.6 Surface Enhanced Raman Scattering (SERS)
 - 6.1.2.9 Attributes of Forensic Markers / Nano Taggants by Type - Compared
 - 6.1.3 Trends - Forensic Markers / Nano-tagants
 - 6.1.3.1 Evolution of End User Markets – Forensic Markers
 - 6.1.3.2 DNA – Synthetic & Biological
 - 6.1.3.3 Nano Taggants combined with other Anti counterfeit Technologies
 - 6.1.3.4 Taggant-infused Textiles
 - 6.1.3.5 Taggants Infused in Liquids / Granules / Powders
 - 6.1.3.6 Taggants Also Protect against Dilution & Refilling
 - 6.1.3.7 Authentication of Printer Consumables + Printed Data
 - 6.1.3.8 Coatings - Spray Coating Large items with Forensic Markers
 - 6.1.3.9 Taggants that provide discrete and instant authentication with hand held devices
- 6.2 Security Optical / Holographic Devices & Materials Producers - OVIDS / DOVIDS
 - 6.2.1 Leading Companies – Security Optical / Holographic Devices & Materials Producers
 - 6.2.2 Overview – Security Optical / Holographic Devices & Materials Producers
 - 6.2.2.1 Security Hologram Classifications

- 6.2.2.2 Protection for 1st, 2nd & 3rd levels of defence with holographic devices
- 6.2.2.3 Security Holograms - Feature Options
- 6.2.2.4 Move back to reflection holography
- 6.2.2.5 Packaging Materials Can Carry Holographic Images
- 6.2.2.6 Low Cost Non Holographic Security foil Authentication Solution
- 6.2.3 Trends – Security Optical / Holographic Devices & Materials Producers
 - 6.2.3.1 Evolution of Security Hologram Technologies
 - 6.2.3.2 Embossed Holograms Vulnerable to Cloning
 - 6.2.3.3 A Technology of the Future – Reflectance Holography
 - 6.2.3.5 Digital signature storage in holograms
 - 6.2.3.6 Combining Holographic Features with Other Security Devices
 - 6.3.2.7 Holographic Threads and tamper evidence added to labels
 - 6.3.2.8 The Need for Continuous Enhancements in Security Features
- 6.3 Security Inks, Coatings, Pigments & Dyes for Brand Protection
 - 6.3.1 Leading Companies - Security Inks, Coatings, Pigments & Dyes for Brand Protection
 - 6.3.2 Overview - Security Inks, Coatings, Pigments & Dyes for Brand Protection
 - 6.3.2.1 Thermochromic Inks / Temperature Activated
 - 6.3.2.2 Photochromic Inks
 - 6.3.2.3 Photonic Colour
 - 6.3.2.4 Hybrid Thermochromic / Photochromic Inks
 - 6.3.2.5 Optically Variable Colour Change Inks (OVIs)
 - 6.3.2.6 Ultra Violet (UV) Inks
 - 6.3.2.7 Metameric inks
 - 6.3.2.8 Laser Activated Colour Change Inks
 - 6.3.2.9 Rub Reactive / Coin Reactive / Touch Sensitive / Scratch Off Inks
 - 6.3.2.10 Magnetic Inks
 - 6.3.2.11 Conductive Inks
 - 6.3.3 Trends - Security Inks, Coatings, Pigments & Dyes for Brand Protection
 - 6.3.3.1 The Traditional Security Ink market has already Reached Maturity
 - 6.3.3.2 Most Inks are Visible / Overt – This is a Limitation
 - 6.3.3.3 Taggants Infused in Inks have Significant Potential
 - 6.3.3.4 Niche Growth Opportunities in Security Inks
 - 6.3.3.5 Combining Security Inks with Other Types of Security Feature
- 6.4 Overlay Technologies
 - 6.4.1 Leading Companies – Overlay Technologies
 - 6.4.2 Overview - Overlay Technologies
 - 6.4.3 Trends - Overlay Technologies
- 6.5 Digital Watermarking Embedded in Print

- 6.5.1 Leading Companies - Digital Watermarking
- 6.5.2 Overview - Digital Watermarking
- 6.5.3 Trends - Digital Watermarking
- 6.6 Surface Feature Authentication
 - 6.6.1 Leading Companies - Surface Feature Authentication
 - 6.6.2 Overview - Surface Feature Authentication
 - 6.6.3 Trends - Surface Feature Authentication
- 6.7 Non-Holographic 3D Moving Image Devices
 - 6.7.1 Leading Companies - Non-Holographic 3D Moving Image Devices
 - 6.7.2 Overview - Non-Holographic 3D Moving Image Devices
 - 6.7.3 Trends - Non-Holographic 3D Moving Image Devices
- 6.8 Smart phone Systems with visible Printed & Covert Printed Codes
 - 6.8.1 Leading Companies – Smart phone Systems with Printed & Not Printed Codes
 - 6.8.2 Overview - Smart phone Systems with Visible Printed & Covert Printed Codes
 - 6.8.3 Trends - Smart phone Systems with Visible Printed & Covert Printed Codes
- 6.9 Self Authenticating Systems
 - 6.9.1 Leading Companies – Self Authenticating Systems
 - 6.9.2 Overview - Self Authenticating Systems
 - 6.9.3 Trends - Self Authenticating Systems
- 6.10 Units Costs Comparisons – Security Technologies

7. TRACK & TRACE / MASS SERIALISATION /AUTHENTICATION

- 7.1 Leading Companies - Mass serialisation / Coding Systems
- 7.2 Overview –Track & Trace / Mass serialisation
 - 7.2.1 Methods of Reading Serialisation Numbers
 - 7.2.2 Serialisation versus Randomisation
 - 7.2.3 Encryption
 - 7.2.4 Random Encrypted Numbers – No Database Required
 - 7.2.5 2D Barcode Serialisation Systems
 - 7.2.6 ‘Real Estate’ Limitations
 - 7.2.7 Invisible Barcodes
 - 7.2.8 Multiple Points of Entry to the Supply Chains
 - 7.2.9 Consumer Enabled Product Authentication with Smart Phone
 - 7.2.10 Multiple Readings of a Single Code
- 7.3 Trends–Track & Trace / Mass serialisation
 - 7.3.1 Digital Printing is set to Transform Mass Serialisation
 - 7.3.2 Consumer Enabled Product Authentication – Mass Serialisation
 - 7.3.3 Track, Trace & Authenticate – An Emerging Trend

7.4 Analysis of Track & Trace Products Used for Authentication and Identification

8. ACCESSING ADDITIONAL ONLINE CONTENT & THE MOBILE WORLD

8.1 Background

8.2 Accessing Additional Content Online

8.2.1 Types of Mobile Action Codes

8.2.2 Types of Interactive Experience

8.2.3 Types of Additional Content

8.3 Mobile Action Codes - 2D / QR Codes or NFC

8.3.1 Case Study - NFC Tags or QR Codes

8.3.3 Evolution of NFC Enabled Handsets

9. TAMPER EVIDENT SOLUTIONS

9.1 Types of Tamper Evident Solutions

9.1.1 Tamper Evident Labels

9.1.2 Security Label Substrates

9.1.3 Security Tear Tapes / Tear Strips

9.1.4 Injection Moulded Tamper Evident & Non-Refillable Closures

9.1.6 Shrink Sleeves

9.1.7 Other Tamper Evident Packaging & Label Formats

9.2 Trends in Tamper Evidence

10. HARD TO REPLICATE PACKAGING & PRINT – ANOTHER BARRIER

10.1 Making it Harder for the Counterfeiter with Packaging Designs & Finishes

10.1.1 Glass Bottles

10.1.2 Hot Foil Stamping, Cold Foiling, Holographic Effects

10.1.3 Cartonboard Packaging, Flexible Films, Foils and Labels

10.2 Economic Factors in Packaging Manufacture

10.3 Intelligent Use of Inks Can Help

10.3.1 Digital Colour Matching – Another Barrier

10.3.1 Thermochromic Inks in the Drinks Industry

APPENDIX I - Driving Forces - Extent of the problem / Level of response

APPENDIX II – Notes on Types of Product Crime

Counterfeiting and Piracy

Counterfeiting and Piracy - Forgery/Alteration Fraud

Counterfeiting and Piracy - Copy and Look-alike Products

Counterfeiting and Piracy - Parallel Trading, Grey Markets and Diversion

Counterfeiting and Piracy - Unauthorised Distribution, Back Door Trading and Over-runs

Counterfeiting and Piracy – Dilution, Substitution refilling and remarking

Tampering, Retail / Supply Chain Theft, Returns Fraud

Tampering

Retail and Supply Chain Theft

Returns Fraud

APPENDIX III WCO's Vertical End User Markets Most Targeted
