Abstracts

Global Advanced Combat Helmet Market is expected to reach \$3.0 Billion by 2024 from \$1.6 Billion in 2016, growing at a CAGR of 7.9% from 2016 to 2024. By geography, Asia Pacific and North America are expected to grow at a CAGR of 9.5% and 7.6%, respectively, during the forecast period. Natick Contracting Division has developed a new Advanced Combat Helmet (ACH), along with the support of US Army Soldier Systems Center. This new advanced helmet consists of communication devices, impact protection, night vision devices, nuclear, biological & chemical defence equipment and other items and provides various other protection to the soldiers. It also consists of enhanced 4-point retention and pad suspension system and are much lighter in weight as compared to the previous PASGT infantry helmet. They can be adjusted accordingly for suitable fit and stability. The ACH weighs around 3 lbs for the medium size, 3.25 lbs for large size and slightly more than 3.6 lbs for the extra-large. These helmets are capable of providing the desired protection to soldiers at any situation and at diverse range of operational environments and injury threats.

The factors propelling the growth of the advanced combat helmet market are technological advancements, increasing security threats in homeland & in cross borders and growing safety concerns of security personals. Though, malfunctioning of certain technologies and high cost of these helmets may hamper the adoption rate. Furthermore, emerging economies might provide several opportunities in the forecast years.
