Abstracts

Global Aerosol Market is estimated to reach \$94.4 Billion by 2024 with CAGR of 3.9% between 2016 and 2024. An aerosol is a colloid of liquid droplets or fine solid particles, in air or other gas. These can be anthropogenic or natural. Examples of natural aerosols includes forest exudates, fog, and geyser steam. While some of the artificial aerosols includes dust, particulate air pollutants, haze, and smoke. Aerosols are mostly used in paints, room fresheners, perfumes, medical products, deodorants in process to hold liquid dews in pressurized form.

The global aerosol market is expected to witness positive growth over the forecast period due to growing usage of aerosols in medical products, paints, adhesives, food, and automotive. Growing demand for air care products along with personal care products such as shaving and depilatories, hair care products, skin care products and deodorants are expected to create positive impact on the market for aerosols. Lack of awareness regarding product availability and use of aerosols are the major factor restraining the market growth. Growing urbanization and industrialization in developing countries are the major opportunities for the market players to enter these markets.

The global aerosol market has been categorized as application, and geography. Application segment is further bifurcated into household, automotive industry, paint and varnishes, food, personal care, insecticide, and other applications. By geography, the
