Abstracts

Global Automatic Number Plate Recognition Market is estimated to reach \$1.4 Billion by 2014 with CAGR of 13.3% between 2016 and 2024. The automatic number plate recognition (ANPR) is an image processing technology, which is used for mass surveillance. It can capture and detect the images of vehicles and identify their license number. It is greatly helps to recognize the criminality at local or national level. ANPR is also used at electronic toll collection for pay-per-use roads and monitoring traffic activity. It enables to store the captured images and the text from license plate along with a photograph of the driver.

Major driving factors of the global automatic number plate recognition market are initiative by various government bodies to incorporate new technology for safety & security for general public, increasing rates of crime & terrorist threats, development of smart cities with technological advanced solutions. Though, variations in license plate designs across different states or countries may hamper the growth of the market. Additionally, increasing adoption of ANPR systems across various sectors such as defense, government offices, and shopping malls, among others would provide

opportunity growth in the upcoming years.

The global automatic number plate recognition market has been bifurcated into application, end-use industry and geography. Application, it is further segmented into security & surveillance, vehicle parking, traffic management and toll enforcement. Additionally, end-use industry is segmented into government (homeland security, traffic department and defense) and commercial (entertainment & recreation facilities and dedicated car parks).

By geography, the market is segmented into North America, Europe, Asia-Pacific and rest of the world (RoW). The U.S., Canada and Mexico are covered under North America wherein Europe covers U.K., Italy, France, Germany and Rest of Europe. Asia-Pacific covers China, Japan, South East Asia, Australia and Rest of Asia Pacific. Rest of the World (RoW) covers South America, Middle East and Africa.
