## **Abstracts**

Global Automotive Adhesive and Sealants Market is estimated to reach 2,217 kilo tons by 2024; growing at a CAGR of 6.4% from 2016 to 2024. Adhesives presently utilized in the automotive industry are generally synthetic in nature, with raw materials as acrylics, polyester resins, vinyl acetate monomer, amine based resins, epoxide resins, ethylene, and propylene and others. Nevertheless, major industry contributors are increasingly framing innovative products using renewable feedstock and bio-based. Sealants, which were conservatively acrylic-based or silicone, are also being advanced with innovative technologies and renewable feedstock to foster improved product properties. New technologies as multipurpose sealants and anchoring introduced by Sika AG own waterproof properties designed exactly for automotive applications.

Global automotive adhesive and sealant market growth has been principally driven by the high development in global automotive market over the past years. Adhesives and Sealants are most chosen because of their competence to reduce vibration and noise. Some of the most projecting adhesives and sealants are polyurethanes, acrylic, silicone, polyvinyl etc. Adhesives and Sealants are used in construction, and building, automotive transportation, woodwork and furniture, packaging, etc. A number of innovative chances are coming in this market. Increasing demand in the automotive market has amplified focus on Adhesives and Sealants. To serve this enlarged demand

of Adhesives and Sealants, a number of new funds are being made by the raw materials suppliers.
