Abstracts

Global Cold Chain Logistics Market is estimated to reach \$386 billion by 2024; growing at a CAGR of 14.0% between 2016 and 2024. Cold chain logistics involves refrigeration, storage, transportation and distribution of perishable products or temperature-sensitive products. The development of concept and technology for controlling the temperature of perishable products has been well-established over the years. The products that can be transported by cold chain logistics include frozen foods, meat products, pharmaceutical drugs & vaccines and dairy products, among others. Transportation of temperature-sensitive products can be done through several means which includes air cargo, refrigerated truck, railcars and cargo ships. Depending on the type of product and its destination, a product may be transported through one or more types of facilities. Additionally, there has been growing number of delivery services owing to the rise of E-commerce for fresh foods and grocery sales.

Growing import & export opportunities for drugs & vaccines and rising organized retail & food service industry are boosting the growth of the global cold chain logistics market. Additionally, increasing export demand for processed & frozen food along with rising popularity of multi-temperature refrigerator vehicles are also supporting the growth of the market. Nevertheless, third party logistics, express delivery service provider and exemptions on taxes on several items may provide market opportunities in forecast
