Abstracts

Global Electric Motor Market is estimated to reach \$173 billion by 2024; growing at a CAGR of 5.7% from 2016 to 2024. Electric motors are driven by the magnetic force, which transforms electrical energy into mechanical energy. It is one of the biggest advancements in the field of technology and engineering. There are various types of motors developed for different purposes. Apart from basic types of motors, numerous types of motors have been developed with special features such as stepper motor, and linear induction motor (LIM), among others, designed as per the requirements of the industry. Motors have a wide variety of uses and are found in cars, hair dryers, fans, drills, clocks, fridges, water pumps, DVD players, washing machine and industrial equipment including mills, robots, extruders, and fork-lift trucks, among others.

Major drivers of the global electric motor market are growing automobile production, rise in adoption of electric vehicles, growing application of induction motors & electronic motors replacing gas turbines in industrial plants. However, fluctuation in the price of electronics in emerging economies and shortage of raw material may hamper the growth of the market. Additionally, rapid commercialization and urbanization, various on-going construction projects of mega cities & metro rails in emerging economies would

provide opportunity in the upcoming years.

The global electric motor market is segmented based on the output power, type, application and geography. Output power segment is further bifurcated into FHP and IHP. By type segment, it is segmented into AC motor, DC motor and hermetic motor. Furthermore, application is segmented into motor vehicle, HVAC equipment, machinery, household appliances, aerospace, and commercial.

By geography, the global electric motor market is segmented into North America, Europe, Asia-Pacific and Rest of the World (RoW). The U.S., Mexico and Canada are covered under North America wherein Europe covers U.K, Germany, Russia and others. Asia-Pacific covers China, India, Australia and others. Rest of the World (RoW) covers South America, Middle East and Africa.

Key players of electric motor market are Schneider Electric SE, Baldor Electric Company, Siemens AG, Kirloskar Electric Company, Denso Corporation, Bosch Group, Toshiba International Corporation, Rockwell Automation, General Electric Company and ABB Ltd.
