Abstracts

Global Homeland Security Market is estimated to reach \$479.3 Billion by 2024; growing at a CAGR of 6.3% from 2016 – 2024. The homeland security offers products, services, and systems to the government and private sector administrations for the protection of public and private properties of a nation from harmful intimidations. These offerings or aids are applied in various fields including aviation security, border security, cyber security, maritime security, and others. Border security guards a nations border area from illegal infringing or trespassing of people, drugs, smuggled goods, weapons, terrorist attacks, and others. Maritime security covers safety of oceanic boundary of countries, vessels, ports, and facilities such as oil storage facilities, and passenger vessel terminals, among others.

The danger of terrorist attack has led to an upsurge in aviation security expenditure. The illegitimate arms and drug trading and immigration has led to sharp border and seaport security and has enlarged the demand for explosive recognition or detection systems, baggage screening and systems body scanners. The risk of a cyber-attack or cybercrime disrupting public as well as private network and infrastructure has motivated the cyber security expenses across the past era. The need for active documentation and identification and security checking, control and the need to provide access control to critical infrastructure have led to the adaptation of biometric and other advanced

identification technologies.
