Abstracts

Global Hospital Bed Market is estimated to reach \$7,271 million by 2024; growing at a CAGR of 4.5% from 2016 to 2024. A hospital bed is essential for patients as it provides services such as comfort, safety, relief, and flexibility during recovery or operation period. Customizable features of these beds aid in maximizing the comfort of patients. Electric bed, semi electric bed and manual are the different types of hospital beds available in the market. These beds can also be adjusted according to need of the patients such as size, comfort, and safety. There is an increased demand for these beds for home care, especially for bedridden or geriatric patients.

Rapid increase in population, rising chronic diseases, expanding hospital budgets, and focus on improving patient's experiences are some of the aspects boosting the growth of the global hospital bed market. Though, high costs could hamper the adoption among end-users. Furthermore, innovations in hospital beds could provide future scope for the market in the coming years.

The global hospital bed market has been bifurcated into type of treatment, power type,

application, and geography. By type of treatment, the market is categorized into long-term care beds, acute care beds, critical care beds, and others. Furthermore, power type is categorized into manual, electric and semi-electric. Application segment is bifurcated into birthing beds, general purpose bed, bariatric beds, pressure relief beds, pediatric beds, and others.
