## **Abstracts**

Global Military Personal Protective Equipment Market is estimated to reach \$24.5 billion by 2024 with CAGR of 6.5% between 2016 and 2024. Several military conflicts and terrorist activities have highlighted the importance of personal protective equipment for dealing with events involving chemical, biological, and nuclear agents. Military personal protective equipment provide protection from serious injuries caused from interaction with physical, chemical, radiological, electrical, mechanical or any bio-hazards matter. Various companies are continuously working to provide precise personal protective wears. Numerous personal protective equipment designed for safety include hand & foot protection, eye protection, face protection, and head protection, among others.

Driving factors such as growing awareness about safety & security of military personals, initiative by government in procurement of personal protective wears, high conflicts at borders among various countries and rising threat of terrorism expected to increase the growth of the military personal protective equipment market. Though, high cost incurred for the wellbeing and for security procedures may hamper the growth of the market. Additionally, technological advancements, light weight body armor and personal

protective equipment for female military personals due to increasing number of females joining the armed forces would provide opportunity for the growth in the upcoming years.

The military personal protective equipment market has been segmented based on the product, application and geography. Product segment includes advanced combat helmet (ACH), pelvic protection systems (PPS), life safety jacket, body armor (BA), improved outer tactical vest (IOTV), military combat eye protection (MCEP) and others. Furthermore, applications are segmented into army, air force, navy and others.
