Abstracts

As per the latest report published by Variant Market Research, Global Nanoelectromechanical Systems (NEMS) Market is estimated to reach \$126.9 Million by 2024; growing at a CAGR of 27.7% from 2016 to 2024. Global Nanoelectromechanical systems (NEMS) are made of electromechanical devices controlled by electric circuit. NEMS have critical dimensions ranging from hundreds to few nanometers. Their heat capacities are far below than yoctocalorie and low in energy dissipation. NEMS are produced mainly by two methods such as top-down and bottom-up. They can also be produced by combination methods where molecules are combined into a top-down framework system. The next generation NEMS are being made by carbon nanotube, known as the building block, owing to increasing knowledge of

electrical and mechanical properties and overall technological advancements. NEMS are highly used in various applications such as biological & chemical sensors, energy harvesting, ultrahigh frequency resonators, drug delivery and others.

Driving factors such as rising demand for low cost, less power consumptions and miniaturization form of devices are propelling the growth of the NEMS market. Increasing use of NEMS technology in automobile and electric sector also boosts the growth of the market. Increasing applications in combination of biology and biotechnology might provide several growth opportunities in the coming years. Though high cost on nano elements may hamper the growth of the market.

The Nanoelectromechanical Systems (NEMS) market is segmented based on the product type, material, application and geography. Product type segments includes nano Tweezers, sansoresonators, nano replay & switches, BioNEMS, nano sensors, gyroscope, nanoaccelerometers, nanoactuators, nanorobots and others. Material segment is bifurcated into gold & platinum based NEMS, grapheme based NEMS, silicon carbide based NEMS, silicon based NEMS, gallium arsenide based NEMS, indium arsenide based NEMS and others. Furthermore, application segment is divided into communication, semiconductor industry, monitoring & detection, industrial process & control, medical sector, automotive, military & defense and others.

The NEMS market by geography is segmented into North America, Europe, Asia-Pacific and rest of the world (RoW). The U.S., Mexico and Canada are covered under North America wherein Europe covers France, Germany, UK, Spain, Russia, Italy and others. Asia-Pacific covers China, India, Japan, South Korea, Australia, Singapore and others. Rest of the world (RoW) covers South America, Middle East and Africa.
