Abstracts

Global Orthopedic Soft Tissue Repair and Sports Medicine Market is estimated to reach \$13 Billion by 2024; growing at a CAGR of 7.9% from 2016 to 2024. Soft tissue injuries occur through direct or indirect trauma to ligaments, muscles, joint capsules, or others. This leads to increased pain, inflammation, and altered internal tissue stress. Soft tissues can be healed or repaired by fixing rotator cuff, shoulder labrum, ACL/PCL, meniscal repair, graft options for tendons and cartilage along with devices for hip arthroscopy. These devices are basically used for closed technique treatments of injured or worn joints. These treatments are majorly performed on knee and shoulder joints while interest among surgical community in hip and small joint arthroscopy is also growing.
