Abstracts

Global Sleeping Aids Market is estimated to reach \$96 billion by 2024; growing at a CAGR of 6.3 % from 2016 to 2024. Sleeping aids are drugs and medical devices used to identify and treat different sleeping disorders. Sleep apnea, insomnia, daytime sleepiness are indications of sleep disorder. Human health is harmfully affected by these sleep disorders which can cause various chronic diseases, such as high blood pressure, diabetes, arthritis, stroke, and obesity. It is important to treat and diagnose these sleep disorders to avoid major adverse effects on human health.

Changing consumer lifestyle, rise in demand for sleeping pills, increase in geriatric and obese population, and increasing disposable income are the factors boosting the growth of the global sleeping aids market. Moreover, advanced technologies and rising awareness about sleeping disorders would provide several market opportunities in coming years. Though, various side effects of sleep aids medication and patent expiration might hamper the growth of the market.
