Abstracts

Global Small Cell Power Amplifier Market is forecasted to reach \$7 billion by 2024; growing at a CAGR of 21.9% from 2016 to 2024. Smart cell power amplifier is used in various spectrums to enhance 3G, 4G, and 5G signal strength in the given specific region. It advances the data transmission rate through improved network coverage. Increasing adoption of smartphone and need for improved data speed pose a huge demand for small cell power amplifier.

Some of the major driving factors of global small cell power amplifier market are growth in percentage of internet users, typical network slowdown, and high demand for smartphones & wireless devices. However, increasing installation of macro cell base stations may hamper the growth of the market. Growing consumer awareness towards high data transmission would provide growth opportunity for the market.

The global small cell power amplifier market is divided by gain in amplifier and end user. Gain in amplifier segment includes 27.5 dB, 32 dB, 36 Db, 39Db, and others. End user is further segmented into small cell base stations, customer premises equipment, datacards with terminals, power amplifier driver, and wideband instrumentation.

Geographically, the market is categorised into North America, Europe, Asia-Pacific and Rest of the World (RoW). The U.S., Mexico and Canada are covered under North America wherein Europe covers Germany, France, UK, Italy, and others. Asia-Pacific covers China, India, Japan and others. Rest of the World (RoW) covers South America, Middle East and Africa.

Major companies operating in this market are Broadcom Corporation, NXP Semiconductor, Qorvo Inc., RFHIC Corporation, Anadigics Inc., TekTelic Communications Inc., and Texas Instrument among others.
