## **Abstracts**

The Asia-Pacific palm oil market is forecasted to reach US\$44.54 billion in 2027, experiencing growth at a CAGR of 6%, during the period spanning from 2023 to 2027. Growth in the Asia-Pacific palm oil market is supported by factors such as growing population, surging biofuel production, expanding cosmetics sector and escalating application in various markets. However, the market growth would be challenged by growing labour challenges, rising economic and social issues and increasing environmental concerns. The market is anticipated to experience certain trends like accelerating baked goods & confectionery retail sales, rapid adoption in laundry detergent market, rising initiatives to ban Trans Fat and growing shift towards palm oil crop transplanting.

Palm oil is an edible vegetable oil that is extracted from the flesh or pulp (the outer part) of the fruit of the oil palms. It is a versatile oil, used as a raw material for both food (cooking oil, shortenings, margarine, and as a feedstock for biofuel) and non-food industries (consumer products, including soaps, cosmetics, candles, and detergents).

The Asia-Pacific palm oil market by region can be segmented into the following regions: Indonesia, Malaysia, Thailand, India, China, Pakistan, Bangladesh and Philippines. In 2022, the dominant share of palm oil production was held by Indonesia, followed by Malaysia and Thailand. The fastest growing country, both in terms of production and consumption, is Indonesia due to increasing palm oil plantation area, favourable government regulations and rising number of edible oil manufacturers engaged in palm oil production activities.
