## **Abstracts**

The global contract logistics market is forecasted to reach US\$329.7 billion in 2026, growing at a CAGR of 5.45%, for the time period of 2022-2026.

Factors such as growing e-commerce industry, increasing food and beverages demand, improving consumer confidence index, rising urbanization levels and rising focus on green supply chain are expected to drive the market growth. However, growth of the industry would be challenged by dearth of skilled professionals in developing economies and intense competition. A few notable trends include escalating consolidation activities, technological advancements, high adoption of internet of things (iot) and emergence of blockchain service.

On the basis of functions, in-house segment leads the global contract logistics market followed by outsourcing activities. Logistics for the manufacturing industry comes down to proper routing management. Logistics companies assist with bills-of-lading and freight scheduling to reduce the costs of shipping products to the vendors.

The fastest growing regional market is Asia-Pacific. The growth would be supported by improving economic conditions, increasing e-commerce industry and growing premium food & beverages demand, the contract logistics services.
