Abstracts

The global employment screening market is forecasted to reach US\$5.75 billion in 2026, experiencing growth at a CAGR of 5.51% during the period spanning from 2022 to 2026. Growth in the global employment screening market has been supported by factors swelling youth population, increasing urban population, increasing number of start ups, improved regulatory compliance, enhanced quality of workforce, rising digitalization, growing data theft and data destruction. However, the market growth would be challenged by discrimination concerns, and time consuming process.

The global employment screening market can be categorized into the following sectors: IT & Telecom, Manufacturing, Retails, Banking, Financial services & Insurance, Travel & Hospitality, Government Agencies, Healthcare and Others. In 2021, the dominant share of global employment screening market was held by IT & Telecom sector. The market is anticipated to experience certain trends like involvement of artificial intelligence, increase in mobile workforce and job immigrants owing to globalization, automated employee screening services, and growing international opportunities.

The global employment screening market can be segmented into the following regions: North America, Europe, Asia Pacific, Middle East & Africa, and South America. In 2021, the dominant share of global employment screening market was held by North America. There is a growing demand for time efficient selection systems in North America owing to rising number of job applicants.

The U.S. employment screening market can be segmented into three services:
