Abstracts

The global intensive care beds market is estimated to reach US\$4.14 billion in 2024, growing at a CAGR of 4.21% for the period spanning from 2020 to 2024. The factors such as rising aging population, increasing healthcare expenditure, increasing per capita disposable income, technological advancements, rising number of chronic diseases, growing infections & contamination rates are expected to drive the market. However, growth of the industry will be challenged by high cost of the advanced hospitals beds. A few notable trends include increasing number of hospital beds, increasing investments in healthcare infrastructural development and rising home care services.

The global intensive care beds market is segmented into electric, manual and semielectric intensive care beds. The global intensive care beds market is highly dominated by electric intensive care beds owing to the rising number of hospital admissions.

The global intensive care beds market is expected to grow in future due to rising health expenditure and growing incidence rates of chronic diseases. In terms of geographical areas, North America and Europe are major contributors to the global intensive care beds market supported by rising spread of infectious diseases. Asia Pacific represents the fastest growing market for intensive care beds with rising investment in healthcare infrastructure and increasing chronic diseases prevalence.
