Abstracts

The global ventilator market is predicted to reach US\$3 billion in 2024 recording growth at a CAGR of 16.48% during the period spanning 2020-2024. The growth in the market is supported by various factors like increasing healthcare spending, rising air pollution, growing obese population and increasing prevalence of cardiovascular diseases. The market is expected to experience certain trends like increasing diabetic population and expanding geriatric population. Certain challenges like decline in the cigarette consumption and ventilator associated pneumonia restrained the market growth.

The global ventilator market by type can be segmented into the following: non-invasive and invasive. In 2019, the dominant share of the market was held by non-invasive segment. The market by mobility can be segmented into the following categories: intensive and portable. The dominant share of the market was held by intensive segment. The global ventilator market by mode can be segmented into the following: combined, volume and pressure, with the dominant share held by combined mode. The market by application can be segmented into the following: critical care and neonatal care. In 2019, critical care held the dominant share of the market.

The global ventilator market by region can be segmented into the following regions: North America, Europe, Asia Pacific, Latin America and Middle East & Africa. In 2019, the highest share of the market was held by North America, followed by Europe and Asia Pacific.
