Date:	September 22, 2007
Pages:	24
Price:	US\$ 800.00
ID:	G1026A6BF8DEN

Filters are traditionally being used in various industry segments including automotive, agriculture, construction, industrial, diesel locomotive, medical, pharmaceutical and food and beverage processing industries among others. Filters are now increasingly finding their applications in niche industry segments including biotechnology, vaccines, plasma, cell therapy and critical care.

Vehicles are the largest segment for filtration products and it is likely to continue as a major driver of growth for the overall filtration market. This is because of the changes in emission laws that are placing ever increasing demands on filtration systems. Vehicle filters find their applications in on-road vehicles like trucks, buses, automobiles and off-road vehicles like construction equipment, mining equipment and agricultural equipment. On-road and off-road vehicles use filters to clean air for intake and emissions and to clean liquids, such as oil and hydraulic, coolant, and transmission fluids.

Globally, the filtration market has grown at a slow pace, but in the subsequent years, after 2007, the effect of legislation on tightening air emission standards is expected to show results for the filtration market. For reducing harmful emissions, use of effective filtration technologies is involved and so it could drive the revenues of filtration companies like Donaldson and Clarcor.

Further, continued growth is expected for the engine filtration segment also because of the fact that the demand for aftermarket heavy-duty filtration products remains strong due in part to high levels of freight transport to move goods worldwide.

The report is a study on the global filtration market. It analyzes the size and growth of the filtration market by segments and by geography. Various segments of the market have been analyzed to develop an understanding of the applications of filters. The report also studies the various factors that are responsible for the growth of the industry. The competitive landscape of the fragmented market has been assessed with focus on three leading players – Pall Corporation, Clarcor and Donaldson.

### Table of Content

#### 1. FILTRATION MARKET – AN INTRODUCTION

The section provides a basic understanding of air or dry and liquid or wet filters

#### 2. GLOBAL FILTRATION MARKET - SIZE AND GROWTH

The section assesses the size and growth of filtration market and provides breakdown of filtration market according to segments.

#### 3. MAJOR FILTRATION MARKET SEGMENTS

The section studies the application of filters in various segments including vehicles (on-road and non-road),

industrial (aerospace, microelectronics, medical), utilities (power plants and water facilities) and consumers.

- 3.1 Vehicles
- 3.2 General Industrial
- 3.3 Utilities
- 3.4 Consumer

#### **4. GEOGRAPHICAL GROWTH – FILTRATION MARKET**

It provides information on the size and growth of filtration market by geography

#### **5. GROWTH DRIVERS**

#### **6. COMPETITIVE LANDSCAPE**

- 6.1 Market Share of Leading Players
- 6.2 Industry Consolidation

#### **7. LEADING PLAYERS IN THE VEHICLE FILTRATION MARKET**

- 7.1 Pall Corporation
  - Company Profile
  - Leading Market Positions
  - Distribution Strategy
  - Financial Performance
- 7.2 Clarcor
  - Company Profile
  - Leading Market Positions
  - Distribution Strategy
  - Financial Performance
- 7.3 Donaldson
  - Company Profile
  - Leading Market Positions
  - Distribution Strategy
  - Financial Performance

#### **8. MARKET FORECAST**

#### **TABLES AND FIGURES**

- Figure 2.1: Global Filtration Market Segments: 2006
- Figure 4.1: Filtration Market by Geography: 2006
- Figure 4.2: US Automobile Market: Sales of Cars and Light Trucks
- Figure 6.1: Global Filtration Market: Share of Leading Players (2006)
- Figure 7.1: Pall's Sales by Segment (2006)
- Figure 7.2: Clarcor's Sales by Segment (2006)
- Figure 7.3: Donaldson's Sales by Segment (2006)
- Figure 8.1: Global Filtration Market Forecast: 2007-2010
