The penetration of hearing instruments is currently very low, offering immense opportunities to all the players in the hearing aid value chain – component suppliers, manufacturers, distributors and retailers. Technological changes (like digitization), ease of use, and increased consumer awareness would all contribute towards deepening the penetration rate.

The report focuses on the worldwide hearing aid market – value, growth rate, and new markets. It also discusses the key trends prevalent in the market. The report provides comprehensive analysis of the consumer behavior and penetration of hearing instruments.

The report profiles the major manufacturers and retailers, including their major business strategies. It also analyses the competitive landscape of the industry.
