The tissue implant market is vast, competitive and high-growth sector. It covers human tissue products and products derived from human tissue. The products are purely tissue based products, wherein tissues are processed into a product. There are synthetic products also which are used as a substitute of tissues. This market also includes the medical and surgical equipments to certain extent.

The application of these products spreads across various markets and surgical procedures. The applications of these products range from various segments of orthopedics like trauma, spine, joint replacement, to breast reconstruction and hernia repair.

The whole process of tissue implant starts from the donor to the processing unit and then finally reaching the hospitals or the patients. The players in this industry are manufacturers, distributors, medical technology companies. Few of the major players are LifeCell, Stryker, and Synthes.

This report covers the tissue implant market. It discusses the types of tissues, sources and distribution chain. It also talks about the various surgical procedures or markets like spine, trauma where tissue implants are being used. It discusses the regulatory environment covering this market, the growth drivers and the competitive landscape.
