Abstracts

Only about 36% of Multiple Sclerosis (MS) patients are currently treated with MS drugs, this percentage is expected to increase to 56% by 2014 as new oral MS therapies are launched, which shows bright opportunity for oral drugs in multiple sclerosis market. The injectables market is big but leaves certain side effects which bring the possibility for the oral drugs to succeed. It is expected that oral drugs will bring some ease for the patients. In Canada the prevalence rate of MS is the highest with closely followed by United States which is the second most affected region with increasing death rates of MS patients. Also the prevalence rate in Germany, Norway and Hungary is high. In 2008 the MS treatment market has shown good results despite the slowdown in US and with this success the probability for further growth has increased.

Gender has become a dominant factor in MS during the last decades. The studies have proved that MS prevalence rate is higher in women than man, but the cause of the disease has not been found. MS is the fourth leading cause of disability among American women. Early Age Smoking is also one of the major environmental factors which have increased the chances of MS disease. MS is slowly spreading its reach in the Asian regions. Asia can be a potential market in future.

This report analyses the global multiple sclerosis market demand and potential opportunities prevailing in the market. It gives an overview of the disease and prevalence worldwide, also covers the total market for MS treatment. It presents global MS injectable market growth and discussion of various medicines market share. The report also focuses on the growth of the industry in United States. It gives an overview of the trends and opportunities present in the industry. It also analyses competition in the market with an overview of industry players and their business strategies.

Contents

1. INTRODUCTION: MULTIPLE SCLEROSIS

Relapsing-remitting MS

Secondary Progressive MS

Primary Progressive MS

Progressive-relapsing MS

1.1 FDA-Approved Drugs for the Treatment of Multiple Sclerosis

2. GLOBAL MULTIPLE SCLEROSIS MARKET

2.1 Market Size

Market Value

Prevalence Rate

Mortality Statistics

2.2 Multiple Sclerosis Injectable: Market Share

Injectables Market Value

Market Share

3. US MULTIPLE SCLEROSIS MARKET

Market Overview

Prevalence Rate

3.1 U.S. Injectables Market

MS Injectables Market

4. INDUSTRY TRENDS

4.1 Prevalence of CRPS in Multiple Sclerosis Patients

4.2 Environment Causes Increase in Multiple Sclerosis Cases

4.3 Increasing Female to Male ratio for Multiple Sclerosis

4.4 Demand of MS Diagnosis

5. OPPORTUNITIES

5.1 Oral MS Drugs to Replace Injectables

5.2 Opportunities in Asian Region

6. COMPETITIVE LANDSCAPE

Market Share

7. COMPANY PROFILES

7.1 Teva Pharmaceutical Industries

Overview

Business Strategies

Expanding its Reach

Broad Product Portfolio

Operating Leverage

7.2 Biogen

Overview

Business Strategies

Strategic Agreements

Vast Geographical Presence

7.3 Elan Corporation

Overview

Business Strategies

Collaborations and Agreements

7.4 Merck Serono S.A.

Overview

Business Strategies

Expansion Project for Erbitux

Diversified Geographic Presence

Broad Product portfolio

8. MARKET OUTLOOK
