Abstracts

The U.S. equipment rental market is expected to record a value of US\$68.52 billion in 2026, growing at a CAGR of 5.47%, for the time period of 2022-2026. The factors such as rise in party & event planning, growth in oil & gas production, rising employment and rapid urbanization would drive the growth of the market. However, the market growth would be challenged by tracking equipment utilization, processing equipment return and balancing portfolio and cash flow. A few notable trends may include rising use of management software, continuous technological advancements and growth in government projects.

The U.S. equipment rental market is growing due to the expansion of the construction industry. There is a substantial growth in the number of rental service consumers as contractors and dealers are opting for rentals to reduce the size of their fleet and lower the complexity in organizations that may otherwise affect activities, namely, asset disposals, logistics, maintenance, and procurement. As there are growing number of infrastructure projects the adoption rate of rental services is rising, which is accelerating the growth of the equipment rental market in the U.S.

The Home Depot, United Rentals, Ashtead Group (Sunbelt Rentals), Herc Holdings, H&E Equipment Services and BrandSafway are the major players dominating the U.S. equipment rental market.
