## Abstracts

Electricity supply in the first quarter of 2022 increased by 7.8% svck 2021

Although the power supply in Q1 increased, it is likely that a shortage of electricity will occur in the next quarter when electricity demand increases sharply, meeting the requirements from the post-Covid production resumption.

Power supply depended on hydroelectricity

In Q1, coal-fired power plants faced many difficulties (down 4.6% svck 2021) when domestic and world coal prices increased, domestic coal supply was affected when the Covid-19 epidemic broke out strongly.

Instead, hydropower was concentratedly mobilized (+18.9% svck 2021) thanks to good water storage, especially hydroelectricity from the Central region to the South.

Renewable energy continued to be expected

In Q1, mobilizing electricity supply from renewable energy increased sharply, (+23% svck 2021). From the end of 2021, Trung Nam's Eo Nam wind power project was put into operation with a total COD capacity of up to 399.6 MW (the largest wind power project in the country).

Forecast of power supply in Q2

Hydroelectricity: A weaker La Nina trend is expected to benefit southern hydropower plants, pushing rainy areas into the Central and South Central regions later. However, the number of hydroelectric power plants in the North and Central regions will decline, affecting the structure of electricity mobilization in the second half of 2022.

Thermal power: When hydropower supply is limited, thermal power is expected to be used more. However, with the current rise in coal and gas prices, the cost of producing electricity is expected to increase; electricity prices in the competitive market may increase in the second quarter.

## Contents

- 1. SUMMARY**
- 2. MACROECONOMICS**
- 3. ELECTRICITY SUPPLY**
- 4. ELECTRIC POWER TRANSMISSION AND DISTRIBUTION**
- 5. ELECTRICITY CONSUMPTION**
- 6. ELECTRICITY PRICE**
- 7. FORECAST**
- 8. NEWS**
- 9. APPENDIX**

## List Of Tables

### LIST OF TABLES

#### 1. Electricity supply

Price of coal sold for electricity generation (coal bran type 1), 2020 - 2021

Estimated gas supply output for electricity generation, 2021 - 2035

#### 2. Electricity consumption

Commercial electricity output by distribution companies (billion kWh), 2019 – 2021f

#### 3. Forecast

National electricity system capacity (base load scenario), 2020 - 2045f

#### 4. Appendix

Solar radiation data in Vietnam

Solar power price list, 2021

Geothermal potential by regions

Theoretical potential and technical potential of tidal power

Top 10 typical enterprises in the electric power transmission and distribution industry\* in Vietnam, 2020

List of potential coal-fired power sources for investment consideration, 2025f – 2045f

List of potential coal-fired power sources for investment consideration, 2025f – 2045f

Hydropower system capacity\*, 2020 – 2045f

Capacity of renewable energy system, 2020 – 2045f

Electricity retail price list for manufacturing industries

Electricity retail price list for administrative and non-business sectors

Price list of retail electricity for business

Price list of retail electricity for domestic use

Electricity wholesale price list

## List Of Figures

### LIST OF FIGURES

#### 1. Macroeconomics

GDP growth of electricity, gas, hot water, steam and air conditioners, Q1/2019 Q4/2021

Index of industrial production of electricity generation, transmission and distribution, Q1/2019 Q4/2021

Consumer Price Index, Q1/2019 – Q1/2022

Index of industrial production of electricity, gas, hot water, steam and air-conditioning industry, Q1/2019 Q1/2022

Foreign direct investment capital in the electricity generation and distribution; gas, water, air conditioning production industry 2017 2021

Price index of raw materials, fuel and materials used for electric power and steam production, Q1/2019 Q1/2022

#### 2. Electricity supply

Total electricity supply, 2017 Q1/2022

Structure of domestic power sources in Q1/2022

Structure of power output by fuel source, Q1/2019 – Q1/2022

Domestic coal production output, 2017 Q1/2022

Import of coal of all kinds of Vietnam, 2017 Q1/2022

World coal price\* and average import coal price of Vietnam, 1/2019 3/2022

Structure of coal import volume by country, Q1/2022

Coal-fired power output, 2019 3M/2022

National installed capacity of coal-fired power, 2020 2045f

Vietnam's natural gas exploitation, 2016 Q1/2022

Structure of domestic exploitation of natural gas consumption by purpose of use

Prices of natural gas in Phu My and world natural gas 2019 2022

Gas-fired power output, 2017 3M/2022

Forecast of ENSO pheVietnam's commercial electricity output, 2017 2021nomena 2022

Hydropower output, 2017 3M/2022

Power output from renewable energy sources, 2017 3M/2022

#### 3. Electric power transmission and distribution

Electric power transmission output of EVNNPT, 2017 3M/2022

Electricity loss rate of EVNNPT, 2017 3M/2022

#### 4. Electricity consumption

Vietnam's commercial electricity output, 2017 2021

#### 5. Electricity price

Average total electricity market price (FMP), 2019 2022

## 6. Appendix

Distribution of main power plants

Number of enterprises in the electricity generation industry, 2018 2019

Wind characteristics in 3 regions

Number of enterprises in the electric power transmission and distribution industry, 2018 2019
