Abstracts

The global tanning industry is characterized by small and medium – sized family businesses, mainly concentrating in South Korea, Taiwan, China and Indonesia. However, many enterprises are now facing the lack of materials and have to import large amounts of leather materials.

In the past years, the growth rate of global leather consumption is contributed mainly by cow leather, but the increase was not significant, while consuming sheep and goat leather has continuously dropped. In contrast with the decline in consumption in North America and Europe, the demand for rawhide in developing countries tends to rise sharply. The Far East continues to be the largest net importer of cowhide due to the lifting demand for leather products in this region. Meanwhile, Latin America is the biggest cowhide exporter.

The global footwear production reached 24.3 billion pairs in 2014. Contributing the most in this output is China and India, which are two footwear factories of the world due to cheap production cost and high population growth. Asia contributed 53% in the global footwear consumption in 2014, as this is populous area where many emerging markets concentrate.

Footwear production is a key industry of Vietnam. The domestic tanning sector is still facing issues in terms of materials, environment, technology and human resources. Production is still under export processing form with the material supplied from abroad and designed assigned by foreign customers. Therefore, even though the footwear export value is high, reaching over US\$12bn in 2014 but the added value for each item is low. The localization ratio in the leather and footwear sector is merely 50%, which is not enough for satisfying fully the rules of origin in trade agreements that Vietnam has

signed.

Being beneficial from the yuan devaluation of China, the footwear production growth rate of Vietnam reached 12% in 2015, after many famous shoe brands switched their orders from China to Vietnam to avoid investment risks. The major export partners of Vietnam include the US, EU and Japan.

The majority of typical enterprises in the leather and footwear industry of Vietnam is foreign invested ones. Domestic businesses account for very small shares, mainly producing for local demand and processing for orders from abroad. Thai Binh Shoes is the only Vietnamese brand having the revenue of over VND2,000bn, becoming the partner for many famous footwear brands from the US and Europe.

The “Vietnam Leather and Footwear Industry Report Q2/2016” elaborated by Vietnam Industry Research and Consultant Jsc. (VIRAC) draws an all-around picture about the leather and footwear sector in Vietnam, brings to readers a clear insight about the historical and current developing trends of the industry by categories: materials, production – consumption, export – import, price movement and distribution system. Specifically, the report analyzes the economic situation in general and the leather and footwear industry in particular through the latest data updated to Q2/2016, beside the forecasts about the output, scale and expanding trend of the sector in the future. The report also mentions about related products such as leather shoes, bags, suitcase, hat, gloves, etc. It also give detail information about large businesses in the industry such as Pou Yuen, Chang Sin or Thai Binh Shoes through analyzing their financial statements, technology status and market shares in order to position and identify the level of competitiveness among firms in the market.

EXECUTIVE SUMMARY

1. BUSINESS ENVIRONMENT

1.1. Macroeconomics Situation

Figure 1. GDP growth and CPI, 2010 – 6 months/2016

Figure 2. Monthly CPI Fluctuations, 2014 – 6/2016

Figure 3. Disposable income and household spending, 2008 – 2017f

Figure 4. Average population and growth, 2004 - 2015

Figure 5. Export - Import turnover of Vietnam, 2010 – 6 months/2016

Figure 6. Distribution structure of the Leather – Footwear Industry in the export turnover, Jun 2016

Figure 7. VND/CNY Exchange rates

Figure 8. FDI attraction by sectors in the first 6 months of 2016

Figure 9. Retail sales in Vietnam (billion USD)

Figure 10. The share of modern retail in total retail revenue, 2014

Figure 11. Consumer Confidence Index (Q1/2014 – Q2/2016)

1.2. Legal Barriers

Table 1. Legal documents related to leather quarantine

1.3. Trade Agreements

Figure 12. Footwear export structure of Vietnam, 2014

Table 2. Current leather – footwear import taxes of some countries

Table 3. Tax reduction schedule for footwear products and footwear materials of Vietnam

Table 4. Some regulations of EVFTA and GSP

Table 5. Some regulations of the EU with imported leather – footwear products

2. GLOBAL LEATHER AND FOOTWEAR INDUSTRY OVERVIEW

2.1. The Leather and Footwear Industry Value Chain

2.2. Production Methods

2.3. The Leather Industry

2.3.1. Raw Materials

Figure 13. Number of cow, buffalo, sheep, goat and other animals providing soft leather, 2010 - 2014

Figure 14. Cowhide, buffalo hides, sheepskin and goat skin, 2010 – 2014

2.3.2. Production

Figure 15. Leather production, 2010 – 2014

2.3.3. Consumption

Figure 16. Consumption of leather, 2010 – 2013

Figure 17. Leather consumption structure by products, 2013

2.3.4. Export – Import

Figure 18. Leather export, 2010 – 2014

Figure 19. Leather export, 2010 - 2013

Table 6. Top export – import countries, 2014

2.3.5. Price Movement

Figure 20. Price movement of rawhide in the US, 2011 – 6 months/2016

2.3.6. Some Typical Countries

2.4. The Footwear Industry

2.4.1. Raw Materials

Figure 21. Footwear material import, 2010 – 2014

Figure 22. Top importers of footwear materials

2.4.2. Production

Figure 23. Global footwear production, 2010 – 2015

Table 7. Top 10 footwear producers, 2015

Figure 24. Footwear production structure by region, 2014 – 2015

2.4.3. Consumption

Figure 25. World footwear consumption, 2010 – 2014

Figure 26. Consumption by region, 2015e

Table 8. Top 10 footwear consuming countries, 2014 – 2015

2.4.4. Export – Import

Figure 27. Footwear export, 2010 -2015

Table 9. Top 10 exporters by value, 2015

Figure 28. Import structure by region, 2015

2.4.5. Footwear Price

Figure 29. Global export price of footwear, 2004 – 2015

Figure 30. Footwear CPI in the urban areas, 2011 – 6/2016

2.4.6. Some Typical Countries

2.4.7. Famous Brands

3. VIETNAM LEATHER AND FOOTWEAR INDUSTRY OVERVIEW

3.1. History of Formation and Development

3.2. Industry Scale and Features

Figure 31. Localization ratio by enterprises and sectors (%)

3.3. The Leather Industry

3.3.1. Raw Materials

Figure 32. The number of buffalo, cow, goat and other animals supplying soft leather, 2010 – 2014

Figure 33. Unprocessed hides, 2010 – 2014

3.3.2. Production – Consumption

Figure 34. Leather production value of domestic enterprises, 2010 – 6 months/2016e

3.3.3. Export

Figure 35. Leather export, 2010 – 2015e

Figure 36. Leather export structure by country, 2014

3.3.4. Import

Figure 37. Leather import, 2010 – 2015e

Figure 38. Leather import structure by country, 2014

3.3.5. Inventories

Figure 39. Inventory by leather types, 2010 - 2015e

3.4. The Footwear Industry

3.4.1. Raw Materials

Figure 40. Raw material import, 2010 – 6 months/2016

Table 10. Materials supply capacity, 2015

Figure 41. Raw material import structure, 2015
