Abstracts

VIETNAM TEXTILE AND APPAREL INDUSTRY

The world textile industry is deeply influenced by the macroeconomic fluctuations. China is the world's largest textile factory with a complete supply chain and advantages of machinery and low-price labor. Developed countries such as the US, Italy, Korea and Hong Kong dominate the stages that brings about higher added value such as design, marketing and branding, commercialization and export.

It is predicted that in the next 5 years, emerging markets with large population size such as China, India, ... will grow strongly; Meanwhile, the textile market in developed countries, especially European countries, will tend to be saturated and grow slowly.

The textile and apparel industry is one of Vietnam's key industries, the industry with the second largest export turnover with export value contributing from 10-15% to GDP. In recent years, the textile industry has continuously developed at an average rate of 17% per year.

According to the General Statistics Office, by the end of 2017, Vietnam had nearly 11,000 textile companies with small and medium-sized companies making up the majority. Although FDI enterprises accounted for only 25% in quantity, they contributed more than 59.9% to Vietnam's apparel export turnover in 2018.

In 2018, fiber production output of the whole country increased by about 12.2% compared to the same period in 2017. The consumption output in 2018 was estimated to increase by 14.6% compared to 2017. In 2018, clothing production volume increased by 5% compared to 2017, due to positive export growth from export orders to many large countries such as the US, Japan, and South Korea increased. Textile and apparel exports in 2018 increased by 14.5% over the same period in 2017, bringing textile and

apparel to the second position, after exporting phones and components.

Domestic textile enterprises are weak in knowledge-intensive stages such as building distribution, export, design and branding systems. It is predicted that Vietnam's textile and apparel export turnover may reach 50-55 billion USD by 2025 thanks to FTAs.

SUMMARY

I. Business environment

1. MACROECONOMIC SITUATION

2. LEGAL FRAMEWORK

II. Industry situation

1. GLOBAL TEXTILE AND APPAREL MARKET

1.1 Industry scale

1.2. Global value chain

1.3. Spinning

1.4. Dyeing Textile

1.5. Garment

2. VIETNAM TEXTILE AND APPAREL MARKET

2.1. Vietnam textile and garment market's overview

2.2. Spinning

2.3. Dyeing textile

2.4. Garment

2.5 Export system

III. Prospect

IV. Enterprise analysis

1. GARMENT ENTERPRISE ANALYSIS

2. TEXTILE AND FIBER ENTERPRISE ANALYSIS
