Abstracts

Although 3G has become a mature technology in many developed economies, it is currently driving the mobile broadband uptake in many emerging markets. High technology maturity and decreasing costs for both operators and consumers are boosting emerging 3G markets. Led by the BRIC nations, and in particular China, 3G technology is being widely supported by government in a bid to bridge the mobile divide between emerging and developed countries. As a consequence, Visiongain has determined that 3G service revenues in emerging markets will reach \$74.5 billion in 2012.

3G connectivity is also a boon for emerging markets, where low tele-density and internet penetration means that many potential end-users will look to mobile networks to get online. The increasing availability of low-cost smartphones and tablets will increasingly enable underserved fixed line communication areas to adopt data services such as 3G. Furthermore, improvements in telecommunication services provide a strong economic stimulus to emerging markets, thereby furthering national development. The coming 2012-2017 period will see strong growth in subscriber numbers and operator revenues as many emerging markets finalise their 3G network deployment and aim to tackle full-scale national coverage. The greater availability of 3G networks will also offer significant opportunities for the development of mobile applications and services, such as mobile commerce and health, among others.

The report contains 148 tables, charts and figures that add visual analysis in order to explain developing trends within the 3G market. Visiongain provides forecasts for the period 2012-2022 in terms of value (US\$) for the 3G technologies markets in BRIC & emerging markets, as well as for 3 submarkets (technology, subscribers and service revenue) of the 3G market. In addition, the 4 national 3G markets (BRIC nations) are

forecast and analysed by Visiongain over the period 2012-2022, alongside the 5 emerging markets regions: Latin America, Eastern Europe, Asia Pacific, the Middle East and Africa. The report also includes an exclusive interview, providing expert insight alongside Visiongain analysis.

Unique Selling Points

Comprehensive analysis of the prospects for the 3G technologies markets in BRIC & emerging markets from 2012-2017.

Analysis and forecasting informed by extensive expert consultation with industry leaders. You will be able to read a full transcript of an interview from a leading organisation involved with the 3G market.

148 tables, charts and figures that quantify, analyse and forecast the changing dynamics of the 3G technologies markets in BRIC & emerging markets from 2012-2017.

Forecasts and analysis of three 3G submarkets over the period 2012-2022

Global 3G subscriber forecasts for the period 2012-2017 by technology type -

3G subscriber forecasts for the 4 BRIC national 3G emerging markets, as well as the 8 regional 3G emerging markets for the period 2012-2017

12 regional emerging markets include 3G subscriber forecasts for the period 2012-2017 by technology type -

Global forecasts for 3G service revenues from 2012-2017.

Emerging market forecasts for 3G service revenues from 2012-2017.

Regional emerging market forecasts for 3G service revenues from 2012-2017 in 12 regions.

Analysis of the forces that influence and characterise the 3G technologies markets in BRIC & emerging markets from 2012-2017.

Why you should buy 3G Technologies Markets 2012-2017: BRIC & Emerging Markets Growth

You will receive a comprehensive analysis of the 3G technologies market in BRIC and emerging markets from 2012-2017.

The analysis and forecasting has been informed by extensive expert consultation with industry leaders. Within the report, you will be able to read a full transcript of an interview from a leading organisation involved with the 3G market.

International Telecommunication Union

Global forecasts are made for 3G service revenues from 2012-2017.

Emerging market forecasts are made for 3G service revenues from 2012-2017.

Regional emerging market forecasts are made for 3G service revenues from

2012-2017 in 12 regions.

You will receive a SWOT analysis that examines the 3G technologies market in BRIC and emerging markets from 2012-2017.

What is the structure of the report?

Chapter 1 is the executive summary.

Chapter 2 provides an introduction to 3G technology.

Chapter 3 provides forecasts and analysis of subscriber growth and service revenues over the period 2012 to 2017 for the global and regional 3G market.

Chapter 4 provides forecasts and analysis of subscriber growth over the period 2012 to 2017 for the regional 3G markets and for BRIC countries.

Chapter 5 provides an analysis of the 3G applications and services in BRIC and emerging markets, including the value chain and the different primary and secondary market players.

Chapter 6 provides a SWOT analysis for the main strengths, weaknesses, opportunities and threats.

Chapter 7 provides an expert interview.

Chapter 8 provides an overview of leading companies.

Chapter 9 provides the conclusion.

Chapter 10 is a glossary of acronyms used in the report.

Methodology

This report has been compiled by combining information obtained from a very wide and rich mixture of primary and secondary research sources, producing a broad industry overview. Visiongain sought opinions from leading figures in the 3G technologies market in BRIC and emerging market to underpin the analysis of market drivers and restraints. The study draws on a diverse range of official corporate and governmental announcements, media reports, policy documents, industry statements and expert opinion as a basis for discussing and predicting developments in the 3G technologies market in BRIC and emerging market between 2012 and 2017.

Visiongain considers that this methodology results in an accurate, objective mixture of analyses and forecasts.
