Abstracts

The proliferation of cyber attacks over the past decade has meant that many companies and government organisations are now fully aware of the dangers exposed to them through under-protected networks or from individual negligence. The growth of the internet has meant that cyber attacks represent a borderless challenge to security operators, who must now find solutions that are successful within the entire cyber domain rather than a specific tangible location. As a consequence, Visiongain has determined that the value of the global cyber security market in 2013 will reach $68.34bn.

What makes this report unique?

Visiongain consulted widely with industry experts and full transcripts from these exclusive interviews with Lockheed Martin, IBM, QinetiQ, Tempest Security Intelligence, Lacoon Mobile Security and ICS8 are included in the report. As such, our reports have a unique blend of primary and secondary sources providing informed analysis. This methodology allows insight into the key drivers and restraints behind market dynamics and competitive developments, as well as identifying the technological issues. The report therefore presents an ideal balance of qualitative analysis combined with extensive quantitative data including global, submarket and regional markets forecasts from 2013-2023 - all identifying strategic business opportunities.

Why you should buy Global Cyber Security Market 2013-2023

Stay ahead with this comprehensive analysis of the Global Cyber Security market prospects

The report comprises 348 pages
