Abstracts

The economic crisis has hindered packaging demand. This has led to an increase in global competition which has meant that the selection of goods on offer is as high as it has ever been. In fact, the marketplace is almost too saturated, with consumers having to sift through a number of similar looking products in order to find what they are looking for. However, the availability of nano packaging can provide some differentiation as it constitutes a unique, new form of packaging that has captured consumer attention. Visiongain expects the global nano packaging market to attain \$20bn in 2013.

The global increase in competition has meant that the contemporary consumer has become more prudent and careful in their purchasing decisions and this has been even more important given the saturated nature of the shelf life. As a consequence, consumers have become more sophisticated and are looking for a higher level of quality in packaging than they are generally used to. The economic crisis has meant that this higher level of packaging quality is being demanded at an affordable price and consumers seem to be benefiting from this. Again, some of the features that nano packaging has to offer have been able to address the needs of the increasingly demanding consumer. Consumers are looking for extended shelf life to allow for flexibility in consumption, and this is an area that nano packaging has been able to address and there is a continuing research currently being conducted on the topic. The strong barrier properties of nano packaging are one of its most redeeming features and will play a considerable role in driving growth over the duration of the forecast period.

Why you should buy **Global Nano Packaging Market 2013-2023: Opportunities for Nanotechnology**

Stay ahead with this in depth analysis of the nano packaging market prospects

The report comprises 110 pages

Get ahead by studying highly quantitative content delivering solid conclusions benefiting your research and analysis

103 tables, charts, and graphs quantifying and forecasting the nano packaging market

Read exclusive expert opinion interviews from industry specialists informing the analysis

and the prospects for established companies and new market entrants.

What makes this report unique?

Visiongain consulted widely with industry experts and a full transcript from an exclusive interview with nGimat is included within the report. As such, our reports have a unique blend of primary and secondary sources providing informed analysis. This methodology allows insight into the key drivers and restraints behind market dynamics and competitive developments, as well as identifying the technological issues. The report therefore presents an ideal balance of qualitative analysis combined with extensive quantitative data including global, submarket and regional markets forecasts from 2013-2023 - all identifying strategic business opportunities.

How the Global Nano Packaging Market 2013-2023: Opportunities for Nanotechnology report can benefit you

Visiongain's report is for anyone requiring analysis of the nano packaging industry and market. You will discover market forecasts, technological trends, predictions and expert opinion providing you with independent analysis derived from our extensive primary and

secondary research. Only by purchasing this report will you receive this critical business intelligence revealing where revenue growth is likely and where the lucrative potential market prospects are.

If you buy our report today your knowledge will stay one step ahead of your competitors. Discover how our report could benefit your research, analyses and strategic decisions, saving you time.
