Abstracts

The premium car segment in the BRIC countries (Brazil, Russia, India and China) has been one of the fastest growing segments in the global automotive industry over the past five years. The economic expansion of the BRIC nations has not only led to rapid motorisation but recently also to a growing desire for status symbols which automotive luxury and exclusivity can provide.

The main drivers in this segment are a large group of high net-worth individuals and a smaller group of ultra high net-worth individuals. These continuously expanding groups enjoy luxurious lifestyles and many want to show their wealth through the car they drive. High net-worth individuals will remain an important group in the premium car segment in the BRIC countries but in the middle and long term they will move to the two highest submarkets; luxury and ultra-luxury. The premium submarket will increasingly see sales to well-paid business-people and government employees. This will cause the market to move to a state where division between submarkets is similar to developed nations. It will also mean that there is significant growth potential in the whole premium car segment in the BRIC countries.

The BRIC countries will thus become more important to premium car makers and will be taking up a growing share of the global premium car segment. This will result in an increasing focus on adjusting product design and specification to the requirements of consumers in the BRIC countries.

As a consequence, visiongain has determined that the sales in the premium and luxury car segment in BRIC countries in 2013 will reach 1.575,000 units.

Why you should buy Luxury Vehicles in Emerging Markets 2013-2023: Prospects for the Premium Car Segment in the BRIC countries

Stay ahead with this comprehensive analysis of the BRIC automotive premium and luxury industry prospects

The report comprises 133 pages
