Abstracts

The military fighter aircraft market is set for a period of great activity over the coming decade, as the demand for 5th generation fighter jet capability continues among the world's leading military nations. Budget restraints and spiralling costs related to fighter aircraft programmes will act as a drag on the market; however the advent of major projects such as the F-35 Joint Strike Fighter (JSF), coupled with increased procurement from emerging nations, will drive the military fighter aircraft market, valued by Visiongain at \$34.37bn in 2012.
