Abstracts

Military support vehicles may not feature as prominently as traditional armoured vehicles but these are no less important in both military operations and peacetime, as they perform the bulk of transporting personnel and cargo. Military support vehicles remain a key part of defence budgets and a number of nations are looking to replace ageing military support vehicles, many of which were acquired decades ago. Visiongain has determined that the value of the global military support vehicles market in 2012 will reach \$2.84bn.

What makes this report unique?

Visiongain consulted with industry experts and full transcripts from these exclusive interviews are included in the report. As such, our reports have a unique blend of primary and secondary sources providing informed opinion. This approach allows insight into the key drivers and restraints behind contract and programme developments, as well as identifying the leading companies. The report also presents a unique blend of qualitative analysis combined with extensive quantitative data including global, submarket and national markets forecasts from 2012-2022 - all highlighting strategic business opportunities.
