Report Details

Oil and gas production from offshore resources is of considerable importance for energy companies as existing base resources are being depleted at a rapid rate. New significant oil discoveries are becoming less common, with the majority of major finds being offshore. A large amount of undeveloped offshore oil and gas fields as well as new offshore discoveries will help drive the MODU market, especially in deepwater. With strong oil prices persisting, major energy companies are increasingly reinvesting their earnings in exploration and development of offshore oil and gas basins. Visiongain has calculated the value of the global MODU market in 2012 will total \$48.1bn.

According to the International Energy Agency, global oil demand will rise from 88 million barrels today to around 99 million barrels in 25 years time. Over this period the cost of extracting oil will be higher and production from offshore resources will not be as expensive as it was relative to development of onshore hydrocarbons.

Although new technological improvements mean fewer people will be needed on offshore oil and gas drilling rigs, the construction industry behind MODUs and assembly of related technologies is providing employment for thousands of people. For example, the Brazilian marine construction industry has emerged on a vast scale to enable its offshore industry to provide MODUs and technologies for Petrobras to meet its vast oil production targets from its offshore resources.

Most super-major oil and gas companies as well as independent oil and gas companies have each secured a share in the hydrocarbon-rich offshore regions across the globe and demand for MODUs is strong. Meanwhile, health and safety standards and

technology have both improved across the industry, leading to a backlog of orders for new-build MODU.

Unique Selling Points

Comprehensive analysis of the MODU market prospects from 2012-2022.

Analysis and forecasting informed by extensive expert consultation with industry leaders. You will be able to read full transcripts of interviews from two leading companies involved within the MODU market.

144 tables, charts and graphs that quantify, analyse and forecast the changing dynamics of the MODU market between 2012-2022.

Forecasts and analysis for the global MODU market between 2012-2022.

Forecasts and analysis for 4 MODU submarkets from 2012-2022.

Forecasts and analysis for 7 regional MODU markets from 2012-2022.

Analysis of over 20 major national MODU markets, as well as the rest of the world regions for the period 2012-2022.

Analysis of the forces that influence and characterise the MODU market.

Profiles of 55 leading companies operating within the MODU market.

Methodology

This report has been compiled by combining information obtained from a wide and rich mixture of primary and secondary research sources, producing a broad industry overview. Visiongain sought opinions from leading figures in the MODU market to underpin the analysis of market drivers and restraints. The study draws on a diverse range of official corporate and governmental announcements, media reports, policy documents, industry statements and expert opinion as a basis for discussing and predicting developments in the MODU market between 2012 and 2022.

Visiongain considers that this methodology results in an accurate, objective mixture of

analyses and forecasts.

Why you should buy The Mobile Offshore Drilling Units (MODU) Market 2012-2022

You will receive a comprehensive analysis of the MODU market from 2012-2022.

The analysis and forecasting has been informed by extensive expert consultation with industry leaders. Within the report, you will be able to read full transcripts of interviews from two leading companies involved within the cyber security market.

Friede & Golman Ltd; a marine engineering company specialised in designing MODUs,

Maxeler Technologies; a company that provides specialised and tailored computer technologies for high demand applications in the drilling and seismic surveying industry.

You will find 144 tables, charts, and graphs that quantify, analyse and forecast the MODU market in detail from 2012-2022.

You will receive forecasts and analysis of the global MODU market between 2012-2022

You will read forecasts and analysis for 4 subsectors of the MODU market between 2012-2022;

Drill-ship

Semisubmersible

Jackup

Miscellaneous MODUs including drilling barges

You will find forecasts and analysis of 7 regional MODU markets over the period 2012-2022

Africa

You will receive a SWOT analysis that examines the MODU market from 2012-2022

You will discover profiles of 55 leading companies operating within the MODU market

What is the structure of the report?

Chapter 1 is the executive summary.

Chapter 2 provides an introduction to the MODU market.

Chapter 3 includes analysis of the global MODU market. The chapter also includes details of surplus MODU capacity, as well as forecasts and analysis of growth in the 4

submarkets over the period 2012 to 2022.

Chapter 4 focuses on the seven regional MODU markets. The chapter includes spending forecasts and analysis over the 2012-2022 period and analyses major national MODU markets in detail.

Chapter 5 provides a SWOT analysis, discussing the main strengths, weaknesses, opportunities and threats to the MODU market.

Chapter 6 features two interviews from leading companies operating within the MODU market.

Chapter 7 includes profiles of 55 major companies operating within the MODU market.

Chapter 8 is a summary of the report, outlining the conclusions of the analyses.

Chapter 9 is a glossary of acronyms used in the report.

5. SWOT ANALYSIS OF THE MOBILE OFFSHORE DRILLING UNIT (MODU) MARKET 2012-2022

5.1 Strengths

5.1.1 High Demand for Oil and Gas and High Oil Prices

5.1.2 Lower Onshore Spare Production Capacity

5.1.3 Technological Breakthroughs

5.1.4 Aging World MODU Fleet

5.2 Weaknesses

5.2.1 High Risks & Harsh Environments

5.2.2 US Government Regulation

5.2.3 High Costs and Long Lead Times

5.2.4 Difficult Financial Conditions and Tight Credit Markets

5.3 Opportunities

5.3.1 New Offshore Discoveries & Deeper Water

5.3.2 Advances in Logging and Measurement While Drilling

5.3.3 Dynamic Positioning Systems

5.3.4 Autonomous Drilling & Managed Pressure Drilling

5.4 Threats

5.4.1 Developments in Extended Reach Drilling (ERD)

5.4.2 Higher Tax Rates

5.4.3 Lower Energy Demand from the West

6. EXPERT OPINION

6.1 Friede & Goldman

6.1.1 MODU Submarket Conditions

6.1.2 Costs of MODUs

6.1.3 Technologies Onboard MODUs

6.1.4 Time Frame of MODU Construction

6.1.5 Drivers in the MODU Market

6.1.6 Constraints in the MODU Market

6.1.7 Regional MODU Markets

6.2 Maxeler Technologies

6.2.1 Maxeler in the MODU Market

6.2.2 Maxeler's Computing Technologies for MODUs

6.2.3 Seismic Surveying of Deepwater Reservoirs

6.2.4 Computational Restraints

7. LEADING COMPANIES IN THE MOBILE OFFSHORE DRILLING UNIT (MODU) MARKET

7.1 MODU ConstruCtion & Engineering Companies

- 7.1.1 Aker Solutions
- 7.1.2 Daewoo Shipbuilding and Marine Engineering (DSME)
- 7.1.3 Fluor Corporation
- 7.1.4 Friede & Goldman
