Abstracts

The Tight Oil Market 2012-2022 report assesses this rapidly growing sector, which is expected to become an important contributor to future oil supply. Due to the low gas prices in North America, there has been a considerable shift from using horizontal drilling and hydraulic fracturing technologies on gas resources to oil resources. Internationally, areas with tight oil potential are seeing increasing attention. The tight oil market report focuses on the developments in the industry, with analysis of tight oil initiatives across the 7 largest tight oil national markets and rest of the world. Visiongain has determined that the value of the global tight oil market in 2012 will reach \$13.2bn.

What makes this report unique?

Visiongain consulted widely with industry experts and full transcripts from these exclusive interviews are included in the report. As such, our reports have a unique blend of primary and secondary sources providing informed opinion. The report provides insight into key drivers and restraints behind contract and programme developments, as well as identifying leading companies.
