Moist Wound Care

Wound Care Devices

Wound Care Biologics

How will those advanced wound care markets expand? Which applications will generate most money? You investigate that industry, finding the most promising places for investments and sales.

North America - outlooks for leading companies in the advanced wound care market

Next, our report analyses 9 North American advanced wound care specialists, including these:

3M

ConvaTec

Derma Sciences

Hollister Incorporated

Human Biosciences.

There you find where sales growth can occur. Many opportunities remain, with high, expanding revenues possible from 2013. See where best potentials exist.

Europe - prospects for leading companies in the advanced wound care market

You also discover outlooks for 11 European advanced wound care specialists, including these:

Smith & Nephew

B.Braun Melsungen

Coloplast

About

R&D Performance Analysis, 2012

3M always has its name in the top when it comes to innovation. The R&D expenses increased 4.1% in 2012 compared to 2011 and increased 9.5% in 2011 compared to 2010. In 2012, the R&D expenses totalled to \$1.6bn, accounting for 5.5% of net sales. Visiongain believes that a major share of the revenue generated in 2012 was from products introduced in the last 5 years. The company CEO in a recent press release mentioned that 3M firmly believes in innovating during a downturn than good times. R&D expenses measured as a percentage of sales, was 5.5% in 2012, compared to 5.3% in 2011 and 5.4% in 2010.

AWC Product Portfolio, 2013

3M manufactures its advanced wound care dressings under the brand name Tegaderm. 3M began the work on inventing Tegaderm film dressing back in 1978. Three years later, the first test product was launched in the US and in 1987 became the market leader in transparent film dressings.

Having more than 30 years of experience in the wound care market, 3M still continues to innovate and bring in more products into the wound care market. This section describes the product portfolio of 3M in 2013.

3M Tegaderm Hydrocolloid Dressing: Consists of thin polyurethane membrane coated with layer of acrylic adhesive. Permeable to oxygen and water vapour, but impermeable to bacteria and virus. It is indicated for use on minor burns, skin and pressure ulcers and acute wounds.

- **3M Tegaderm Foam Dressing:** Made up of polyurethane foam pad and additional absorbent non woven layer. Bordered by transparent adhesive film
- **3M Tegaderm Alginate Dressing:** Derived from pure Scottish seaweed. Soft in texture and absorbs more than its own weight. Indicated for chronic and acute wounds.
- **3M Tegaderm Alginate Ag Dressing:** Highly absorbent, sterile dressing composed of calcium alginate. Indicated for chronic and acute wounds.

- 3M Tegaderm Hydrogel Dressing: Provides moist healing and promotes debridement. Indicated for minimally draining partial and full thickness dermal wounds.
- 3M Tegaderm Film Dressings: Transparent film dressing providing water resistant breathable barrier to external contaminants.
