Your guide to trends and revenue prospects for treating multiple myeloma

See what the future holds for products to treat multiple myeloma. Visiongain's updated report gives you revenue predictions to 2022. There you find data, trends, opportunities and commercial prospects.

Our study lets you assess forecasted sales at overall world market, product and national level. Those analyses help you see the future of that industry and market.

In our investigation you find revenue forecasting, growth rates and market shares. Also, you see qualitative analyses, news, research and development (R&D) and business outlooks. You receive 42 tables, 39 charts and a research interview.

We show where growth can occur. Our work lets you investigate the most lucrative areas, helping you stay ahead in knowledge.

The following sections highlight what you discover in the report.

Our work shows you prospects for the world market and leading products

In addition to analysis of the overall world market, our study shows you revenue forecasting of five products to 2022:

Revlimid

Thalomid

Actimid

Velcade

Kyprolis.

Also, you see how five late-stage drug candidates - Elotuzumab, MLN9708, Perifosine, Faridak and Aplidin - can perform to 2022. See potential revenues. Our investigation shows you business research and analyses with individual sales forecasts and discussions.

Our work also breaks overall world revenue into leading countries.

National market prospects - which countries will have the highest growth?

There are many commercial opportunities in developed and developing countries, our study shows. You discover individual revenue forecasts to 2022 for eleven national markets:

US

Japan

Germany, France, UK, Italy and Spain (EU5)

Brazil, Russia, India and China (BRIC nations).

There will be high revenue growth in the established pharma markets, but also opportunities in developing countries, especially India and China. Also, product launches from 2012 onwards will benefit leading national markets. Our report shows opportunities for new drugs.

Research and development - you see trends and prospects for technologies

What about the R&D pipeline for that area of oncology? Our work shows you developmental trends by phase. You investigate developments including these:

Monoclonal antibodies (mAbs) and other biologics

Small-molecule products

Protein kinase inhibition

HDAC inhibition

Inhibition of protein synthesis and induction of apoptosis.

Beyond proteasome inhibitors and immunomodulators, promising candidates include HDAC inhibitors, kinase inhibitors and orally-bioavailable second-generation proteasome inhibitors.

Discover how technology can change the treatment of multiple myeloma, finding progress and outlooks. Our investigation shows activities of companies treating that blood cancer.

Leading companies and revenue prospects

What will happen next? The pharmaceutical industry will improve treatments for multiple myeloma and increase revenues from 2012 to 2022. The R&D pipeline is strong.

Overall world revenue for that market area will reach \$9.9bn in 2015, our report forecasts. Incidence and prevalence of multiple myeloma worldwide will stimulate demand to 2022.

Also, biological drugs will transform the market, improving treatment of blood cancer, including neoplasm in bone marrow.

In our study you find discussions and analyses of Celgene, Johnson & Johnson, Novartis, Onyx and other developers and manufacturers. This decade, many opportunities will arise for companies treating cancers.

Nine ways World Multiple Myeloma Drug Treatment Market 2012-2022 helps you

In particular, then, our report gives you the following knowledge on the topic:

Forecasted revenue to 2022 for the overall world market - find the industry's prospects

Potential revenues of 10 products to 2022 - analyse crucial developments

Market forecasting to 2022 for US, Japan, Germany, France, UK, Spain, Italy, Brazil, Russia, India and China - see leading national prospects

Assessment of companies - find discussions of activities, products and outlooks

Review of R&D pipelines - investigate developmental trends and progress

Opinions on the sector - discover views, including a research interview

Investigation of competition and opportunities influencing sales

Discussions of what stimulates and restrains the industry and market

Prospects for established companies and those seeking to launch products.

That work gives you quantitative and qualitative analyses with independent predictions. You receive information found only in our study.

There you find business intelligence to help you understand the future of the industry and market. You see where prospects are lucrative and growth is likely.

Discover how our work could benefit your research and analyses, saving you time too.

By ordering now you discover prospects for products to treat multiple myeloma

Visiongain's study is for everybody needing commercial analyses for the treatment of multiple myeloma. You find data, trends and predictions. Please order our report now.

Visiongain is a trading partner with the US Federal Government

Contents

1. EXECUTIVE SUMMARY

- 1.1 Multiple Myeloma Market Overview
- 1.2 Chapter Breakdown
- 1.3 Research and Analysis Methods

2. OVERVIEW OF MULTIPLE MYELOMA

- 2.1 Multiple Myeloma Represents 10-15% of All Blood Cancers
- 2.2 Demographic Risk Variation in Multiple Myeloma
- 2.3 Medical Basis of Multiple Myeloma: Cancer of the Plasma Cells
- 2.4 Diagnosing Multiple Myeloma
- 2.5 Stages of the Disease
 - 2.5.1 MGUS
 - 2.5.2 Smouldering Multiple Myeloma
 - 2.5.3 The Durie-Salmon Staging System and the International Staging System
- 2.6 Treating Multiple Myeloma
 - 2.6.1 Induction Therapy
 - 2.6.1.1 SCT Following Induction Therapy
 - 2.6.1.2 Radiotherapy: Key Treatment for Plasmacytoma
 - 2.6.1.3 The Plateau: After Induction Therapy
 - 2.6.2 Consolidation Therapy
 - 2.6.3 Maintenance Therapy
 - 2.6.4 Salvage Therapy
 - 2.6.5 Present and Future Options for Treating Multiple Myeloma: Summary

3. THE GLOBAL MULTIPLE MYELOMA MARKET, 2012-2022

- 3.1 Overall Market Forecast, 2012-2022
- 3.2 Leading Product Classes, 2012
- 3.3 Leading Companies in the Market, 2012
 - 3.3.1 Celgene Corporation: Market Leaders
 - 3.3.2 Johnson & Johnson (Janssen): Proteasome Inhibitor and mAb Leader?
 - 3.3.3 Novartis: The Biggest Multiple Myeloma Pipeline
 - 3.3.3.1 Novartis' Multiple Myeloma Growth Strategy
 - 3.3.4 Bristol-Myers Squibb: Multiple Pipeline Candidates
 - 3.3.5 Onyx Pharmaceuticals: Lead Product Cafizomib Approved

- 3.3.6 Cephalon: Pioneering Oral Proteasome Inhibitors
- 3.3.7 Aeterna Zentaris: High Potential
- 3.3.8 Merck & Co. - Increasing Oncology Investment
- 3.3.9 Takeda: Strong Pipeline
- 3.3.10 Pfizer: Promising Pipeline
- 3.4 Leading National Markets
 - 3.4.1 The US will Continue to Dominate the Multiple Myeloma Market
 - 3.4.2 Japan: Revlimid Approval Driving Market Growth
 - 3.4.3 The Leading Five EU Countries
 - 3.4.4 BRIC Nations: Strong Projected Growth
 - 3.4.4.1 Brazil: Government Healthcare Investments Support Growth
 - 3.4.4.2 Russia: High Cancer Prevalence and Rapid Market Growth
 - 3.4.4.3 India: A Rapidly Developing Market
 - 3.4.4.4 China: Pursuing Domestic Oncology R&D

4. LEADING MULTIPLE MYELOMA TREATMENTS IN 2012

- 4.1 Immunomodulators and Proteasome Inhibitors Dominate the Market in 2012
- 4.2 Revlimid (Celgene Corporation)
 - 4.2.1 Drivers and Restraints for Revlimid, 2012
 - 4.2.2 Market Forecast for Revlimid, 2012-2022
- 4.3 Thalomid (Celgene Corporation)
 - 4.3.1 Drivers and Restraints for Thalomid, 2012
 - 4.3.2 Market Forecast for Thalomid, 2012-2022
- 4.4 Actimid (Celgene Corporation)
 - 4.4.1 Drivers and Restraints for Actimid, 2012
 - 4.4.2 Market Forecast for Actimid, 2012-2022
- 4.5 Velcade (Johnson & Johnson, Takeda)
 - 4.5.1 Drivers and Restraints for Velcade, 2012
 - 4.5.2 Market Forecast for Velcade, 2012-2022
- 4.6 Kyprolis (Onyx Pharmaceuticals)
 - 4.6.1 Drivers and Restraints for Kyprolis, 2012
 - 4.6.2 Market Forecast for Kyprolis, 2012-2022
- 4.7 Other Multiple Myeloma Therapy Options, 2012
 - 4.7.1 Doxil (Johnson & Johnson)
 - 4.7.2 Future Products

5. THE NEXT GENERATION OF MULTIPLE MYELOMA TREATMENTS

- 5.1 Overview of the Next Wave of Myeloma Products, 2012
- 5.2 Elotuzumab (Abbott/ Bristol-Myers Squibb)
 - 5.2.1 Elotuzumab: A New MAb Blockbuster?
 - 5.2.2 Revenue Forecast for Elotuzumab, 2012-2022
- 5.3 MLN9708 (Millennium)
 - 5.3.1 MLN9708: Changing the Treatment Paradigm?
 - 5.3.2 Revenue Forecast for MLN9708, 2012-2022
- 5.4 Perifosine (Aeterna Zentaris)
 - 5.4.1 Perifosine: The First of Many Protein Kinase Inhibitors?
 - 5.4.2 Revenue Forecast for Perifosine 2012-2022
- 5.5 Faridak (Novartis)
 - 5.5.1 Faridak: Leading a Wave of HDAC Inhibitors to Market?
 - 5.5.2 Revenue Forecast for Faridak, 2012-2022
- 5.6 Aplidin (PharmaMar)
 - 5.6.1 Aplidin: Inhibiting Protein Synthesis and Inducing Apoptosis
 - 5.6.2 Revenue Forecast for Aplidin, 2012-2022
- 5.7 Other Late-Stage Candidates

6. THE MULTIPLE MYELOMA R&D PIPELINE: SMALL-MOLECULE PRODUCTS, 2012

- 6.1 Phase III Compounds
- 6.2 Phase II Compounds
 - 6.2.1 Ridaforolimus (Ariad Pharmaceuticals, Merck)
 - 6.2.2 Dinaciclib (Merck, Ligand Pharmaceuticals)
 - 6.2.3 Enzastaurin (Eli Lilly)
 - 6.2.4 GSK2110183 (GlaxoSmithKline)
 - 6.2.5 Selumetinib (AstraZeneca)
 - 6.2.6 Ibrutinib (Pharmacyclics)
 - 6.2.7 Imetelstat (Geron)
 - 6.2.8 Istodax (Celgene)
 - 6.2.9 Givinostat (Italfarmaco)
 - 6.2.10 Kineret (Amgen)
 - 6.2.11 PD 0332991 (Pfizer)
 - 6.2.12 SCIO-469 (Johnson & Johnson)
 - 6.2.13 Dasatinib (Bristol-Myers Squibb)
 - 6.2.14 Treanda (Cephalon)
- 6.3 Phase I/II Compounds
 - 6.3.1 Torisel (Pfizer)

- 6.3.2 Everolimus (Novartis)
- 6.3.3 MLN8237 (Millennium Pharmaceuticals)
- 6.3.4 Nexavar (Bayer, Onyx)
- 6.3.5 ARRY-520 (Array BioPharma)
- 6.3.6 AT7519 (Astex Therapeutics)
- 6.3.7 Brostallicin (Pharmacia, NCI)
- 6.3.8 AR-42 (Arno Therapeutics)
- 6.3.9 KW-2478 (Kyowa)
- 6.3.10 Noscapine (Janssen)
- 6.3.11 TH-302 (Threshold Pharmaceuticals)
- 6.4 Phase I Compounds
 - 6.4.1 BMS-833923 (Bristol-Myers Squibb, Exelixis)
 - 6.4.2 Eltrombopag (GlaxoSmithKline)
 - 6.4.3 ENMD-2076 (EntreMed)
 - 6.4.4 Erivedge (NCI, Sidney Kimmel CCC, Genentech)
 - 6.4.5 Folutyn (Allos Therapeutics)
 - 6.4.6 Ganetespib (Synta Pharmaceuticals)
 - 6.4.7 GSK2110183 (GlaxoSmithKline)
 - 6.4.8 INK128 (Intellikine)
 - 6.4.9 IPI-504 (Infinity Pharmaceuticals)
 - 6.4.10 Marizomib (Nereus Pharmaceuticals)
 - 6.4.11 Vidaza (Celgene)
 - 6.4.12 Zarnestra (Johnson & Johnson)
- 6.5 Exploratory Preclinical Compounds

7. THE MULTIPLE MYELOMA R&D PIPELINE: BIOLOGICS, 2012

- 7.1 Phase III Biologic Compounds
- 7.2 Phase II Biologic Compounds
 - 7.2.1 T-Cells Targeted to MAGE- A3/6 and NY-ESO-1 (Adaptimmune)
 - 7.2.2 Siltuximab (Janssen)
 - 7.2.3 Avastin (Roche)
 - 7.2.4 Bexxar (GlaxoSmithKline)
 - 7.2.5 BHQ880 (Novartis)
 - 7.2.6 Donor Lymphocyte Infusion (MD Anderson Cancer Center)
 - 7.2.7 Erbitux (Eli Lilly)
 - 7.2.8 Expanded Natural Killer Cell Therapy (University of Arkansas, Celgene)
 - 7.2.9 GVAX (Cell Genesys)
 - 7.2.10 Hiltonol (Oncovir)

- 7.2.11 KLH Vaccine (National Cancer Institute)
- 7.2.12 Leukine (Genzyme)
- 7.2.13 Mapatumumab (Human Genome Sciences)
- 7.2.14 MDX-1097 (Immune System Therapeutics)
- 7.2.15 Proleukin (Prometheus Labs)
- 7.2.16 Rituxan (Biogen Idec, Roche)
- 7.2.17 Stimuvax (Merck)
- 7.2.18 VEGF Trap (Regeneron)
- 7.3 Phase I/II Compounds
 - 7.3.1 BT062 (Biotest Pharmaceuticals)
 - 7.3.2 HuMax-CD38 (GenMab)
 - 7.3.3 Milatuzumab (Immunomedics)
 - 7.3.4 MOR202 (MorphoSys)
 - 7.3.5 SNS01-T (Senesco Technologies)
- 7.4 Phase I Compounds
 - 7.4.1 ACE-041(Acceleron)
 - 7.4.2 DFRF4539A (Genentech)
 - 7.4.3 Lorvotuzumab Mertansine (ImmunuGen)
 - 7.4.4 LY2127399 (Eli Lilly)
 - 7.4.5 MFGR1877S (Genentech)
 - 7.5.6 Reolysin (Oncolytics)
 - 7.4.7 Dacetuzumab (Seattle Genetics)
- 7.5 Exploratory/Preclinical Compounds
- 7.6 Future Epigenetics-Based Treatments

8. QUALITATIVE ANALYSIS OF THE MULTIPLE MYELOMA MARKET

- 8.1 Strengths: Proven Commercial Potential of the Myeloma Market
- 8.2 Weaknesses: A Few Products Dominate the Market
- 8.3 Opportunities: Cancer Treatment is a Strong Business Segment in the Pharmaceutical Industry
- 8.4 Threats: Will Oncology Remain a Good Investment for Pharma?
- 8.5 Social: Adherence, Support and Education are Key Factors
- 8.6 Technological: The Rise of Cancer Biology
- 8.7 Economic: The Cost of Cancer Treatment
- 8.8 Political: Broadening and Narrowing Healthcare Provision in the 21st Century

9. RESEARCH INTERVIEW

9.1 Interview with an External Authority (Views Given Anonymously)

9.1.1 Obesity is a Strong Risk Factor for Multiple Myeloma

9.1.2 Multiple Myeloma Treatment: Proactive versus Reactive

9.1.3 Treatment Options for Obese Patients

9.1.4 Multiple Myeloma Incidence Will Increase Because of Obesity

10. CONCLUSIONS

10.1 Multiple Myeloma Treatment is a Thriving Market That Will Continue to Expand from 2012 to 2022

10.2 The R&D Pipeline for Multiple Myeloma Treatment is Large and Diverse

10.3 Biological Drugs Will Transform This Market

10.4 The Industry has Commercial Challenges to Overcome

10.5 Concluding Remarks
