Abstracts

The present report, has been prepared with the aim of providing the readers with an overview of Iran's automotive industry. It also examines car production, exports, and imports as it identifies the industry's key players. This report analyzes what has been envisioned in the country's Sixth Development Plan to expand the automotive industry, the approach the industry adopted in the wake of the Joint Comprehensive Plan of Action [the 2015 nuclear deal Iran struck with P5+1], and gaps between realities on the ground and the objectives laid out in the Sixth Development Plan.

Although the title of every chapter can be examined in detail, the present report is designed to put together a collection of information for readers who don't have much time to search the news websites or analyze what is going on. In this report which builds on reports released by official sources of the country, efforts have been made to avoid speculation. Our analyses have been provided by automotive experts with firsthand knowledge of the automotive industry problems and challenges. The readers can make their own interpretations based on the data provided.

This report also takes a look at the approach of global automotive manufacturers to the Iranian market, their future plans for the Iranian market and their cooperation with Iranian automobile manufacturers. What is important here is to keep the report and its analyses short to make it possible for the readers to get more information and analytical insight in a shorter period of time.

Contents

1 NOTES

2 EXECUTIVE SUMMARY

3 INTRODUCTION

4 BACKGROUND OF AUTOMOTIVE MANUFACTURING IN IRAN
