## Abstracts

Industrial sealants are viscous liquids with high adhesive strength, better durability and a higher resistance to corrosion than the industrial adhesives and are thus considered in those situations where adhesives fail to play their roles. Sealants can have a variety of special applications such glass bonding, in appliances, aircraft fuel tanks, as automotive windshield sealants and in the construction of solar panels, to name a few apart their common applications.

Sealants can be of many types such as silicone sealants, urethane sealants, plastisols, elastomeric sealants, gasket, flange sealants and thread sealants. These sealants find applications in many areas such as manufacturing, construction, packaging, consumer goods, automotive and transportation, with the constructions industries being their biggest end-users followed by automotive industries and the others. In terms of production and demand silicones lead the industrial sealants market, although polyurethane demand is also expected to increase steadily in the coming future.

The industrial sealants market has observed an appreciable amount of growth, running parallel to the switch over from metals to plastics by the constructions and the automobile industries in particular and a few others in general. But, a major constraint to the growth of this market is the volatile nature of its raw material which is now coming into highlight as a consequence of the stringent regulations put forward in the favour of a clean and hygienic environment. Nevertheless, bio-based sealants have now come up which are both eco-friendly in nature and cheaper otherwise in terms of production cost, thus helping sustain the industrial sealants market.

China, India & Brazil lead the industrial sealants market, followed by the Rest of the

World (RoW). The key players in the global industrial sealants market include ADCO Global, BASF, Cargill, Croda, Dow Chemical Company, Du Pont, Evonik Industries and Henkel.

The report involved in providing research reports and company profiles in the global industrial sealants market in terms of revenue and output/volume. Market drivers, opportunities and restraints are thoroughly studied which influences the market. This study is further utilized for the overall analysis of the market. The industrial sealants market is segmented based on the global applications, geographic presence, by products and ingredients. We offer an inclusive category-specific market outlook. We provide access to a comprehensive collection of companies in the industry. The companies can strategize and execute business operations through our competitor analysis. Find the global industry analysis, market size, share, growth, and trends information in our industrial sealants profiles.

#### SEGMENTATIONS IN REPORT:

##### Industrial Sealants By Types:

Silicone Sealants

Urethane Sealants

Plasitols

Elastomeric Sealants

Gasket And Flange Sealants

Thread Sealants

##### Industrial Sealants By Application:

Manufacturing

Automotive And Transportation

Construction

Consumer Goods

Packaging

Industrial Sealants By Geography:

Asia Pacific

North America

Europe

Latin America

Middle East And Africa

## Contents

### **1. INTRODUCTION TO THE INDUSTRIAL SEALANTS MARKET**

### **2. EXECUTIVE SUMMARY**

### **3. MARKET ANALYSIS OF INDUSTRIAL SEALANTS**

### **4. INDUSTRIAL SEALANTS MARKET ANALYSIS BY TYPES**

Silicone Sealants

Urethane Sealants

Plasitols

Elastomeric Sealants

Gasket and Flange Sealants

Thread Sealants

### **5. INDUSTRIAL SEALANTS MARKET ANALYSIS BY APPLICATIONS**

Manufacturing

Automotive And Transportation

Construction

Consumer Goods

Packaging

### **6. INDUSTRIAL SEALANTS MARKET ANALYSIS BY REGION**

Asia Pacific

North America

Europe

Latin America

MEA

### **7. COMPETITIVE LANDSCAPE OF INDUSTRIAL SEALANTS COMPANIES**

### **8. COMPANY PROFILES OF INDUSTRIAL SEALANTS INDUSTRY**

ADCO Global

BASF

Cargill  
Croda  
Dow Chemical Company  
Du Pont  
Evonik Industries
