## Abstracts

With an estimated \$20 billion market value, the Constipation is one of the most common gastrointestinal conditions, presenting robust opportunities for development of treatment options. In addition to hard bowel moment, other symptoms of Constipation include bloating and abdominal pain.

Over 50 companies and universities are focusing on developing treatment options for Constipation.

To assist investigators and funding and regulatory organizations, VPA Research has come up with a comprehensive report on Constipation pipeline. The report provides insights into different therapeutic candidates in preclinical, research, discovery, NDA/IND, pre registration, phase 1, phase 2, and phase 3 trials). Drugs under development directly and through combination with other drugs are also included.

Current status, developmental phase, participating companies and entities, recent developments, orphan drug/fast track/other designations, drug class are provided for each Constipation pipeline product. Mechanism of Action and the target area of the pipeline product are also provided. Further, clinical and preclinical trials along with results of the trials are also included in the report.

In addition to complete details of each product, the report provides key trends in Constipation pipeline studies. The products under development are categorized according to their development phase, mechanism and company to provide detailed insights into the type of drugs being developed and the stages of development.
