Abstracts

Gastritis is the inflammation of mucosa, lining of stomach, that can last for shorter periods or longer durations. Infection, alcohol and intake of NSAIDs lead to gastritis. Without treatment, it can last for few years. The market presents robust business growth opportunity.

Around 20 companies and universities are focusing on developing treatment options for Gastritis.

To assist investigators and funding and regulatory organizations, VPA Research has come up with a comprehensive report on Gastritis pipeline. The report provides insights into different therapeutic candidates in preclinical, research, discovery, NDA/IND, pre registration, phase 1, phase 2, and phase 3 trials). Drugs under development directly and through combination with other drugs are also included.

Current status, developmental phase, participating companies and entities, recent developments, orphan drug/fast track/other designations, drug class are provided for each Gastritis pipeline product. Mechanism of Action and the target area of the pipeline product are also provided. Further, clinical and preclinical trials along with results of the trials are also included in the report.

In addition to complete details of each product, the report provides key trends in Gastritis pipeline studies. The products under development are categorized according to their development phase, mechanism and company to provide detailed insights into the type of drugs being developed and the stages of development.
